Attention: Nancy Marconi, Registrar
Regarding: Ottawa River Power Corporation (Ottawa River Power)
Application for Accounting Order Scope Amendment
OEB File Number: EB-2025-0209

Dear Ms. Marconi,

We are writing with respect to the scope of the above proceeding. As noted in the procedural order the original application only sought to establish a deferral account, with the approval of the any disposition of the account to be determined in ORPC's next cost of service application. However, because:

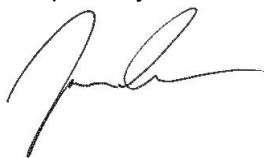

- a) all parties to the original cost of service proceeding have been added as parties to the application;
and
- b) the OEB has provided for a discovery phase and a submissions phase,

we would ask that the OEB make final determinations with respect to both the mechanics of the deferral account and the amount to be disposed of from the account in the context of this application so that the issue need not be canvassed a second time in the cost of service proceeding.

If ORPC's proposal on the scope of the application is accepted, we would suggest that in order to facilitate submissions on these two issues the parties could assume as the starting point that ORPC is proposing that the manner of calculating the relevant revenue requirement is as set out in the application, and that the maximum quantum to be recovered through the deferral account is in relation to the period from May 1, 2022 to the end of ORPC's current CoS period which is currently scheduled to end April 30, 2027.

If there are any questions with respect to this request, please contact the undersigned.

Respectfully submitted,

Justin Allen
