Permit to take water: 4560-CXCRWT

(c) Is the generation facility under construction or extensive rehabilitation?

☐ Yes ☒ No

(d) Has the applicant secured financing?

☐ Yes ☒ No

If no, please describe the applicant's plans to secure financing.

NO FINANCING IS REQUIRED AT THIS TIME Facility has been operational for 30+ years.

11. Facility Connection

Facility #1

(a) What is the voltage at the perimeter of the applicant's property from the output of the generation facility?

☒ 50 kV or less ☐ greater than 50 kV

NOTE:

The [OEB Act](#) defines a "distribution system" as a system for distributing electricity, and includes any structures, equipment or other things used for that purpose. "Distribute", with respect to electricity, means to convey electricity at voltages of 50 kV or less.

(i) Describe the existing or future distribution system from the output of the generation facility to the connection point with the electricity distributor or to the connection point with the transmission system (e.g. length of line, transformers, etc.).

Electricity is generated at 13 kV and a single transformer boosts this to 44 kV.

The 44 kV current passes through a header which connects to both the manufacturing facility and the grid.

From that header, the existing distribution system is two separate 3-conductor lines of a length of approximately 1 mile (1.6 km) each. They are connected to the Hydro One distribution system lines line B1R and M5, just north of INVISTA Canada's facility site.

(ii) Does (or will) the applicant own and/or operate the distribution system?

☒ Yes ☐ No

If yes, does the applicant own and/or operate the distribution system ONLY for the purpose of conveying electricity from the generation facility to the IESO-controlled grid?

☐ Yes ☒ No

If no, please describe the purpose of the distribution system.

1) conveying electricity from the generation facility to the IESO-controlled grid

2) conveying electricity from the IESO-controlled grid to INVISTA Canada Co.'s manufacturing facility, adjacent to the generation facility (which includes Evonik Canada Inc.'s facility).

3) delivering electricity to on-site tenant

NOTE:

If the answer to the question above is no, the applicant may require a distribution licence. The application form along with information regarding when a distribution licence is required can be found at www.oeb.ca. If required, this application should be filed as soon as possible.

(iii) Does (or will) the distribution system connect the generation facility to an electricity distributor?

☒ Yes ☐ No

If yes, please identify the electricity distributor.

Hydro One Limited

(b) Please provide a diagram demonstrating all components of the generation facility, distribution assets to connect to the customer's facility and the connection point to the customer's facility.

[invista-maitland-distribution-system4.pdf](#)

(c) Please identify the ownership of all components included in the diagram provided in the last question, i.e. if the components are owned by the applicant or the customer.

Components are one of three colours.

Dark Blue and Light Blue components belong to INVISTA

Pink Components belong to others - as noted in the diagram

CONFIDENTIAL SECTIONS
