Issues:

CME's members are rate payers for Enbridge Gas Inc. The proposed application relates to a proposed Z factor, as well as the calculation of various rates for the 2026 year, all of which are of interest to CME's members.

Policy Interests:

N/A

Hearings:

CME's answer is subject to the discovery process, but it seems likely that a written or electronic hearing would be appropriate for this application.

Evidence:

CME does not anticipate that it will file evidence in this proceeding.

Coordination with Other Intervenors:

CME expects to coordinate with other intervenors and in particular, rate payers groups, throughout the hearing process, including questions at technical conference or at an oral hearing, and any settlement conference. It is too early to say what sort of substantive collaboration will be possible depending on the parties' positions with respect to the issues.

Cost Awards:

CME has applied for and been granted cost awards in numerous proceedings. CME represents the direct interest of its manufacturing members (who are EGI's ratepayers) with respect to the rates that they pay from services that are regulated by the Board.

Language Preference:

I do not intend to participate in French.
