

NOTICE OF A RATE HEARING

Algoma Power Inc. has applied to increase its electricity distribution rates effective January 1, 2026

Algoma Power Inc. (Algoma Power) has applied to the Ontario Energy Board (OEB) to increase its electricity distribution rates effective January 1, 2026.

The requested rate adjustment is determined using an OEB-approved formula, which is tied to inflation and other factors intended to promote efficiency. If the application is approved as filed, a typical residential customer and a typical general service customer of Algoma Power would see the following increase:

Customer Class	Monthly Rate
Residential R1 (750 kWh)	\$1.35 per month
Residential R (ii) (2000 kWh)	\$6.78 per month
Seasonal (200 kWh)	\$4.60 per month

Other customers, including businesses, will also be affected. It's important to review the application carefully to determine whether you may be affected by the proposed changes.

Algoma Power has also requested:

- Updates to the Rate Design Model to reflect revised cost of capital and PILs components, in line with the OEB's Generic Cost of Capital proceedings
- Approval to include a residual credit balance in Account 1595 (2021) arising from higher-than-expected collections and extended rate rider activity in its 2027 IRM Group 1 disposition
- Approval to dispose of Group 2 Cost of Capital Variance Account balances over a one-year period through rate riders effective until December 31, 2026
