## **SCHEDULE 1- Management Summary**

### **EPCOR NATURAL GAS LIMITED PARTNERSHIP - INTRODUCTION**

As part of the EB-2018-0264 (Rate Order dated January 9, 2020) the Ontario Energy Board (“Board”) approved a Purchased Gas Commodity Variance Account (“PGCVA”) effective January 1, 2020 for EPCOR Natural Gas Limited Partnership Southern Bruce (“ENGLP”). In the EB-2025-0176 Rate Order, the Board approved a decrease by \$0.016443 per m3 from the level of \$0.199948 per m3 to \$0.188887 per m3 effective July 1, 2025.

In EB-2018-0264, the Board also approved a Gas Purchase Rebalancing Account (“GPRA”) to record the increase (decrease) in the value of the gas inventory available for sale to sales service customers due to changes in ENGLP’s cost of gas supply. In the EB-2025-0176 Rate Order, the Board approved for the GPRA to be cleared, resulting in a decrease in the gas supply charge of \$0.015374 per m3 to \$0.188887 per m3 effective July 1, 2025.

ENGLP is proposing to set the gas supply charge, the GPRA rate and the PGCVA reference price effective October 1, 2025 to reflect an updated forecast of gas costs, the projected balance in the PGCVA and the projected balance in the GPRA.

### **RATE MITIGATION**

ENGLP is not proposing any rate mitigation in this application.

## **PURCHASED GAS COMMODITY VARIANCE ACCOUNT**

### Updated Forecasts

The current forecast is based on natural gas prices over the relevant period. These gas prices reflect current contracts and market conditions, including alternative energy prices, demand for natural gas, the weather outlook and the impact of current storage levels. The forecasted demand profile of the franchise area for this application matches the Southern Bruce Gas Supply Plan EB-2025-0140, filed April 30, 2025 (“Gas Supply Plan Update”).

The PGCVA balance has been calculated using the most recent information available, including actual volumes and costs through July 2025. The remaining months in the fourteen-month period ending September 2026 are calculated using estimated prices and volumes based on the best information available at the time of filing.

### Gas Supply Portfolio

The gas supply portfolio reflects the current and forecasted mix of delivery points utilized by ENGLP for system gas purchases. The composition of the gas supply portfolio volumes from October 2024 to September 2025 can be referenced on Schedule 3. This schedule shows the monthly volume of gas purchased, or forecast to be purchased from various delivery points and different pricing structures (including fixed, index, spot). Similarly, the composition of the gas supply portfolio volumes from October 2025 to September 2026 is shown on the top of Schedule 6.

In particular, the gas supply portfolio reflected in this QRAM application reflects an updated Supply/Demand forecast based on observed customer connections. The structure of the purchases are as highlighted, where:

- A percentage of average forecasted consumption for the period from April 1 to March 31 of the following year will be purchased as a fixed price gas landed at Dawn.
- A percentage of average forecasted consumption for the period from April 1 to March 31 of the following year will be purchased as an index price gas landed at Dawn.
- For forecasted demand not met by baseload purchase or firm storage withdrawal rights, month to month Dawn index purchases will be made to meet expected demand.
- Day-to-day spot purchases and sales at Dawn will be made if storage injection or withdrawal adjustments are not appropriate or cannot meet higher or lower than forecasted demand and to minimize risk of triggering fees from the M17 Limited Balancing Agreement (“LBA”).

The forecast values used in this QRAM match the 2025 Gas Supply Plan Update. Actual consumption from October 2024 to July 2025 has been reported for system gas customers during this period, with consumption from August 2025 onwards consisting of forecasted system gas consumption based on preliminary consumption forecast and the consumption forecast in the 2025 Gas Supply Plan Update.

#### Gas Costs

ENGLP’s actual and forecast gas costs from October 2024 to September 2025 are shown in Schedule 4 in \$/GJ by source of supply. These prices are also shown in the middle section of Schedule 3 in \$/m<sup>3</sup>. The bottom section of Schedule 3 shows the composition of the total system gas costs. The conversion factor used is based on the heat values used by Enbridge in their administration of the M17 service contracted by ENGLP to transport natural gas from Dawn to the Southern Bruce franchise through the Dornoch Interconnect. These conversion factors are shown in Schedule 4. All prices and costs shown are actual prices paid from October 2024 to July 2025.

Prices for the remaining months in this period are based on estimates to be paid in those months. The costs shown for the remaining months are based on both the estimated prices to be paid and the estimated volumes to be purchased.

Gas prices for each of the sources of supply from June 2025 to August 2025 are described below.

Actual Cost

*Dawn Fixed Price Transactions:*

There were no fixed price transactions from June 2025 to August 2025.

*Dawn Spot Price Sales Transactions:*

There were no spot sales transactions from June 2025 to August 2025.

*Dawn Spot Price Purchase Transactions:*

In June 2025, ENGLP transacted zero Dawn Spot Priced deals.

In July 2025, ENGLP transacted nine Dawn Spot Priced deals averaging 617 GJ per delivery day.

In August 2025, ENGLP transacted seventeen Dawn Spot Priced deals averaging 276 GJ per delivery day.

*Dawn Index Price Transactions:* ENGLP has not entered into any Dawn Index Price Transactions as of August 2025.

*AECO Index Price Transactions:* ENGLP has not entered into any AECO Index Price Transactions as of August 2025.

## Forecast Pricing

As noted earlier, ENGLP purchases gas from the market at Dawn. The structure of the purchases are as highlighted in the 2025 Gas Supply Plan Update, where:

- A percentage of average forecasted consumption for the period between April 1 and March 31 of the following year will be purchased as a fixed price gas landed at Dawn.
- For forecasted demand not met by baseload purchase or firm storage withdrawal rights, month to month Dawn index purchases will be made to meet expected demand.
- Day-to-day spot purchases and sales at Dawn will be made if storage injection or withdrawal adjustments are not appropriate or cannot meet higher or lower than forecasted demand and to minimize risk of triggering fees from the M17 LBA.

The price forecast for this gas reflects the 21 trading day average of the Dawn hub relevant to the Gas Supply Plan. Forecast prices for all 12 forward months are taken as the arithmetic average of Daily Closing Forward Price for 21 trading days of each forward month, ending August 29<sup>th</sup>, 2025. Noon day average foreign exchange rate of each trading day is used to convert Dawn settlement prices in USD to CAD. Dawn settlement prices were also converted from mmBtu to GJ. These monthly prices are applied to the forecast volume of gas purchases in the Gas Supply Plan. Forecasted price for the fixed priced Dawn purchase for September 2025 to September 2026 is calculated as the 21 trading day average for those future delivery periods at Dawn.

## Compressed Natural Gas

As noted in ENGLP's 2024 annual update to the gas supply plan<sup>3</sup> (and expanded further in response to OEB Staff 2 Compressed Natural Gas (CNG) in the same hearing<sup>4</sup>):

*EPCOR is expecting to procure Compressed Natural Gas (CNG) on a pilot basis during periods of non-coincident peak demand. In the 2023-24 fall/winter season, EPCOR experienced delivery pressure issues in the southern parts of its distribution system. Given the expected growth of the system this year beyond what was contemplated in the CIP (largely concentrated in the southern part of its system), there is a possibility further pressure issues may present itself again in the southern end of the system during periods of non-coincident peak demand. To mitigate the risk of system deliverability issues in the southern end of the system, EPCOR is currently in negotiation with a CNG provider to start introducing CNG during periods of non-coincident peak demand. EPCOR expects to recover the commodity cost of the CNG as part of its QRAM process, and recover the non-commodity portion of the costs related to CNG through the Storage & Transportation Variance Account (S&TVA).*

ENGLP provided further explanation on this topic in response to OEB Staff questions in the Q4 2024 QRAM filing (ENGLP\_EB-2024-0267\_QRAM StaffIRR\_20240913). The OEB provided approval for this application on an interim basis in the September 24, 2024 decision:

*"In response to the questions from OEB staff, EPCOR stated it has not previously received approval from the OEB for the cost consequences of using CNG. The OEB notes that this is the first time EPCOR has requested approval of the cost consequences of using CNG in a QRAM application, that the QRAM process is intended to be largely administrative in nature (and processed in less than 14 days from filing to decision) and that ideally, a more thorough review of using CNG is required. In addition, EPCOR's CNG proposal is currently under review in the consultation on EPCOR's 2024 GSP. As such, the OEB will approve the proposed rates on an*

*interim basis pending OEB staff's release of its report including recommendations to the OEB on the 2024 GSP and pending the OEB's response to that report".*

On February 28, 2025, OEB Staff released the Staff Report to the Ontario Energy Board where it was stated on page 29:

*"OEB staff is of the view that EPCOR's proposed pilot program to use CNG for Southern Bruce is appropriate as a temporary measure for the 2024 heating season and that EPCOR should complete an analysis of options to alleviate the pressure issues. OEB staff believes that EPCOR be allowed to recuperate costs, both commodity and transportation, associated with the CNG pilot program for the 2024 heating season, pending a prudence review on the transportation cost in its annual IRM application."*

In the letter accompanying the Staff Report, the OEB stated:

*The OEB has reviewed the Staff Report and endorses its recommendations summarized in Appendix C of the Staff Report. The OEB expects EPCOR to follow the recommendations made in the Staff Report.*

As such, this QRAM application includes forecasted volumes of 70,000m<sup>3</sup> of CNG purchased during the period of October - December 2025). ENGLP is paying a flow-through rate for CNG based on the market price that the vendor is paying to Enbridge Gas where the CNG facility is located. This customer is on Enbridge's M2 rate. Consistent with its previous application and the recommendation of the OEB Staff report, only the 'Gas Supply – Commodity' and 'Gas Supply – Commodity & Fuel – Price adjustment' values are expected to be included as part of the QRAM. The remaining costs, including the 'delivery portion' of the M2 rates will be added to the S&TVA balance for disposition in the 2025 Custom IR filing (for rates effective January 1, 2026)<sup>5</sup>.

---

<sup>5</sup> EB-2025-0178

### Other Forecast Assumptions

The heat value to convert GJ to m<sup>3</sup> is 39.02 GJ/10<sup>3</sup> m<sup>3</sup> for gas delivered from Enbridge starting April 2025. Enbridge confirmed on February 27<sup>th</sup>, 2025, the heat value conversion factor will be updated to 39.02 GJ/10<sup>3</sup> m<sup>3</sup> effective April 1<sup>st</sup>, 2025. This is consistent with the figure used by Enbridge for gas nominated into the M17 and for managing the M17 LBA, which tracks total consumption for the Southern Bruce franchise on a per GJ basis. ENGLP uses this conversion factor to calculate the cost in \$/GJ and for the pricing of system gas volumes.

### PGCVA Balance

The projected September 2025 balance in the PGCVA, is a debit of \$147,369.53, including a debit of \$7,875.98 in accumulated interest, based on the Board's prescribed interest rate. This estimate is based on actual and forecasted purchases starting October 2024. The PGCVA debit for a typical residential customer equals \$18.70.

### Proposed PGCVA Rate Changes

ENGLP proposes to adjust the reference price effective October 1, 2025 based on the projected accumulated balance in the PGCVA as of the end of September 2025 and the forecasted cost of gas over the twelve-month period. The reference price is set such that the projected PGCVA balance at the end of September 2026 is close to zero.

ENGLP's proposal will clear the PGCVA balance on a prospective basis, eliminating the need for retroactive adjustments. This is consistent with ENGLP Aylmer's past proposals in QRAM applications, which have been accepted by the Board.

ENGLP proposes to decrease the reference price by \$0.018867 per m<sup>3</sup> effective October 1, 2025, (from \$0.183505 per m<sup>3</sup> to \$0.164638 per m<sup>3</sup>.) The derivation of this rate is shown in Schedule 5. This is the reference price required to bring the PGCVA balance close to zero on a twelve-month forecast basis. This change will also be reflected in the gas commodity charge.

## **GAS PURCHASE REBALANCING ACCOUNT**

The impact on the GPRA of the proposed October 1, 2025 PGCVA reference price change from \$0.183505 per m<sup>3</sup> to \$0.164638 per m<sup>3</sup> is a credit of \$20,624,56, as shown on Schedule 8. This figure is shown in column (J) of Schedule 8 on the September 2025 line. It is calculated as the change in the PGCVA reference price between September 2025 and October 2025, multiplied by the cumulative inventory balance at the end of September 2025. This cumulative inventory balance is the sum of the actual monthly inventory balances as of July 31, 2025 and forecasts for the subsequent months. These forecasts will be replaced with actual balances for these months in subsequent QRAM applications as this information becomes available. As well, the monthly inventory balances are based on a deemed level of unaccounted for gas (“UFG”) of the total throughput volume, as shown in column (F) of Schedule 8. The 0.0% is the Board approved level of UFG from EB-2018-0264.

ENGLP proposes to adjust the gas commodity charge effective October 1, 2025 based on the projected accumulated balance in the GPRA. The adjustment to the gas commodity charge will be set such that the projected GPRA balance at the end of September 2026 will be close to zero. The rate required to achieve this is shown in column (K) on Schedule 8. Column (P) shows the reduction of the inventory revaluation balance based on this rate of \$0.016331 per m<sup>3</sup> over the October 2025 through September 2026 period.

ENGLP’s proposal will clear the GPRA balance on a prospective basis, eliminating the need for retroactive adjustments. This is consistent with ENGLP Aylmer’s proposal for the continued prospective clearance of the PGCVA. This change will also be reflected in the gas commodity charge.

## GAS COMMODITY CHARGE

The change in the gas commodity charge proposed for October 1, 2025 is summarized below. The change in the gas commodity charge reflects both the change in the PGCVA reference price and the change in the recovery of the inventory revaluation amount in the GPRA. It does not reflect the approved changes in the system gas supply cost. The change in the gas commodity charge is as follows:

**Table 3 - Changes in Gas Commodity Charge**

	EB-2025-0176 01-Jul-25	Proposed 01-Oct-25	Variance
PGCVA Reference Price	\$0.183505	\$0.164638	(\$0.018867)
<u>GPRA Recovery</u>	<u>\$0.005382</u>	<u>\$0.016331</u>	<u>\$0.000666</u>
Gas Commodity Charge	\$0.188887	\$0.180970	(\$0.007917)

## **SUMMARY**

In summary, ENGLP proposes to decrease the reference price for amounts to be recorded in the Purchased Gas Commodity Variance Account from \$0.183505 to \$0.164638 per m<sup>3</sup> effective October 1, 2025. Appendix B contains the accounting entries related to the PGCVA.

ENGLP also proposes to decrease the gas supply charge from \$0.188887 to \$0.180970 per m<sup>3</sup> effective October 1, 2025. This change reflects the change in the PGCVA reference price and the change related to the recovery of the GPRA balance, both as described above. These changes apply to all system gas customers served under Rates 1, 6, and 11. Customers served under Rate 16 are not impacted by changes in Gas Commodity Charge, as they procure their own supply and are not served by system gas supply. The proposed rate schedules are attached as Appendix A.

Schedule 9 provides a bill comparison showing the impact of the changes in the proposed gas commodity charge on a year over year basis for the appropriate quarter as well as the annual bill impact of the most recent quarterly change for an average residential customer. The annual bill impact related to the change in the commodity charges on a customer consuming approximately 2,149 m<sup>3</sup> is an decrease of \$17.01.

This average use figure of 2,149 m<sup>3</sup> is consistent with the bill impacts presented in ENGLP's 2020 Incentive Rate-setting Mechanism application (EB-2019-0264) and reflects the Board's expectation that QRAM applications would provide bill impacts based on this level for a typical residential customer.

ENGLP will include customer notices reflecting the changes in the gas supply commodity charge with their first bill on or after October 1, 2025. This customer notice has been included, for reference, in Appendix C.

**Unaccounted for Gas (UFG):**

Forecasted UFG is applied to all volumes of gas delivered to the customer.

**Forecasted Unaccounted for Gas Percentage** 0.00 %

**Overrun Charges:**

Any volume of gas taken during the period of December 16 through April 30 inclusive shall constitute “Overrun Gas” and must be authorized in advance by EPCOR. Delivery of these volumes is available at the Authorized Overrun Charge in addition to applicable Upstream Charges and Gas Supply Charges. EPCOR will not unreasonably withhold authorization.

**Authorized Overrun Charge** 17.9093 ¢ per m<sup>3</sup>

Any volume of gas taken during the period of December 16 through April 30 inclusive without EPCOR’s approval in advance shall constitute “Unauthorized Overrun Gas”. Delivery of these volumes will be paid for at the Unauthorized Overrun Charge in addition to applicable Upstream Charges and Gas Supply Charges.

**Unauthorized Overrun Charge** 428.8650 ¢ per m<sup>3</sup>

For any volume of Unauthorized Overrun Gas taken, the customer shall, in addition, indemnify EPCOR in respect of any penalties or additional costs imposed on EPCOR by its suppliers, any additional gas cost incurred or any sales margins lost as a consequence of the customer taking the unauthorized overrun volume.

**Nominations:**

Union Gas Limited will be the “Upstream Service Provider” to facilitate delivery and balancing of gas supplies to the EPCOR Southern Bruce Natural Gas System. For service under this Rate Schedule, the customer shall nominate for transportation of gas volumes for ultimate delivery to the customer. The customer agrees to nominate its daily gas volumetric requirement to EPCOR, or its designated agent, consistent with industry nomination standards including those nomination requirements of the Upstream Service Provider.

The customer shall nominate gas delivery daily based on its daily gas requirements plus the Forecasted UFG rate as set out in this Rate Schedule.

The nomination calculation shall equal:

$$[(\text{Daily volume of gas to be delivered}) * (1 + \text{Forecasted UFG})]$$

Customers may change daily nominations based on the nomination windows within a day as defined by EPCOR’s agreement with the Upstream Service Provider.

In the event nominations under this Rate Schedule do not match upstream nominations, the nomination will be confirmed at the upstream value.

Customers with multiple connections under this Rate Schedule may combine nominations at the sole discretion of EPCOR. For combined nominations the customer shall specify the quantity of gas to each

meter installation (“Terminal Location”) and the order in which the gas is to be delivered to each Terminal Location.

**Load Balancing:**

Daily nominations provided by the customer shall be used for the purposes of day-to-day balancing as required under EPCOR’s arrangement with the Upstream Service Provider.

When a customer’s metered consumption on any day is different than the gas nominated for consumption by the customer on any day, this constitutes a “Daily Load Imbalance”. A “Cumulative Load Imbalance” occurs when the ongoing absolute value of Daily Load Imbalances are greater than zero.

To the extent that EPCOR incurs daily or cumulative load balancing charges, the customer will be responsible for its proportionate share of such charges. Charges related to these imbalances are as defined in EPCOR’s agreement with the Upstream Service Provider.

**Direct Purchase Delivery**

Where a customer elects under this Rate Schedule to directly purchase its gas from a supplier other than EPCOR, the customer or their agent must enter into a T-Service Receipt Contract with EPCOR for delivery of gas to EPCOR at a receipt point listed on the upstream transportation contract that EPCOR has with the Upstream Service Provider (“**Ontario Delivery Point**”). T-Service Receipt Contract rates are described in Rate Schedule T1. Transportation and Storage charges may vary depending on the Ontario Delivery Point. Gas Supply Charges in this Rate Schedule are not applicable for Rate T1 customers.

**Terms and Conditions of Service**

1. In any year, during the period of May 1 through December 15 inclusive, the customers shall receive continuous (“**Firm**”) service from EPCOR, except where impacted by events as specified in EPCOR Natural Gas Limited Partnership Southern Bruce Natural Gas Operations Conditions of Service including force majeure. During the period of December 16 through April 30 inclusive, any authorized overrun service shall be interruptible at the sole discretion of EPCOR. All service during the period December 16 through April 30 inclusive shall be subject to EPCOR’s prior authorization under the daily nomination procedures outlined in this Rate Schedule and shall constitute Overrun Gas.
2. To the extent that EPCOR’s Upstream Service Provider provides any seasonal or day-to-day balancing rights for EPCOR, the customer shall be entitled to a reasonable proportion of such balancing rights as determined by EPCOR from time to time. If the customer utilizes any of EPCOR’s seasonal or day-to-day balancing services or any other services available from the Upstream Service Provider, the customer agrees to comply with all balancing requirements imposed by the Upstream Service Provider. The customer also agrees to be liable for its share of any such usage limitations or restrictions, fees, costs or penalties associated with the usage of such services, including but not limited to any associated storage fees, daily or cumulative balancing fees or penalties, and gas commodity costs as determined by EPCOR, acting reasonably.
3. EPCOR receives upstream services under the Union Gas Limited M17 Rate Schedule. Details of this upstream arrangement and associated nomination standards and Load Balancing Arrangement are available at [www.uniongas.com](http://www.uniongas.com).
4. The provisions in the “EPCOR Natural Gas Limited Partnership Southern Bruce Natural Gas Operations Conditions of Service” apply, as contemplated therein, to service under this Rate Schedule.

Effective: October 1, 2025  
Implementation: All bills rendered on or after October 1, 2025

## **IMPORTANT INFORMATION ABOUT YOUR GAS BILL**

### **Gas Prices:**

As of October 1, 2025, the price of gas and gas transportation will be **decreasing** by \$0.007917 per cubic meter to \$0.180970 per cubic meter. The Ontario Energy Board has approved this change to reflect the prices that EPCOR expects it will be paying to suppliers through to the end of September, 2026. On your gas bill this cost is on the line titled "Gas Commodity".

As a regulated utility, EPCOR is permitted to recover what it pays for the purchase of gas plus any costs reasonably associated with this purchase, but with no mark up or 'profit'. The price on your bill is based on forecasted gas and transportation costs, which are reviewed by the OEB and reconciled with actual costs. The gas portion gets adjusted regularly throughout the year as the price of gas changes.

### **How will the price change impact you?**

That will depend on the amount of gas you use. For a typical residential customer who consumes approximately 2,150 cubic meters of gas annually, this price change will **decrease** your annual heating costs by approximately \$17 per year. For customers who have arranged to have their gas supplied by a gas marketer/broker, the price may or may not change depending on the terms of the contract the customer has with the gas marketer/broker.

*\*Note: Transportation costs refer to costs to get gas into the system; delivery costs refer to the costs to get gas to a specific property.*
