

LETTER OF COMMENT

Comments:

To whom this may concern, I am not for the increase on my gas bill. Gas has already gone up in price every year drastically for the last 5 years. Increasing is for this reason makes no sense since nobody reads the meters anyways. Also I'm sure I'm overpaying for my gas. And if I were to read my meter every month they would not credit me for the overpayment. So many people are having problems with how much gas is maybe you can start by making right on all the overpayments that are not being rectified. Thank you for my consideration, I really hope my expenses don't go up again. I'll be on the streets before you know it and so will others. Be the change that we need. Carole Elderbroom
