

LETTER OF COMMENT

Comments:

We are a middle-low income family, living on old age/disability pensions and limited working income, living in a home rented at approximately \$3000 per month. After all mandatory expense we barely break even. Changes of this type impact will very likely leave us without heat throughout the winters. An increase of any magnitude on what is a necessity expense for Canadians is nothing more than profiteering. There is a reason why heat cannot legally be shut off over winters. This hearing should be about changing this service to be included among our basic human rights, and to remove this corporation's ability to profit off our need to survive a winter.

Name: Jonathan McMullen

Do you reside in the impacted service area?: Yes
