

LETTER OF COMMENT

Comments:

I am writing to express my strong disagreement with Enbridges proposal to increase their distribution rates. Even if the calculation follows the OEBs formula, the resulting impact on everyday people will be significant and unfair. It is concerning that large corporations are able to increase costs while the burden falls on the public. Access to gas is essential, especially during Canadian winters, and rising costs disproportionately affect seniors, equity deserving groups, and those already struggling with housing and basic living expenses. Approving this rate increase in the current economic conditions would place unnecessary financial strain on families and individuals. I urge the OEB to consider the real life impact on Ontarians and to reject this proposal. Thank you for your attention to this matter.
