## **LETTER OF COMMENT**

### **Comments:**

Please reconsider this rate hike. I live in a modest home, with my partner and no children. We do not consume a lot of energy and our bills are already a struggle to pay. Our delivery fee alone is always more than our actual usage, let alone regulatory charges and tax. Not to mention, consistent brown-outs this summer with no explanation or understandable cause, which I believe fried the control panel in my only 2 year old oven. We are not receiving the service to justify a rate hike. Please think about the state of the economy and how people are struggling right now when you consider this decision.
