LETTER OF COMMENT

Comments:

I do not approve an increase in delivery rates for Enbridge Gas Distribution. Since 2022, the Company has doubled almost doubled its profits every year and is on track to beat its annual 2024 results as of today. Its stock price is up 8% YTD, 23% for a trailing 1 year period and 50% for a trailing 5 year period. I see no need why any cost increase tied to "inflation and other factors to promote efficiency" should be passed onto the consumer. Gas is an essential public service, and the Company should be able to absorb the increased cost and let its profit margin take a hit. Let the pain be borne by the shareholders rather than the consumer for once!
