

## **LETTER OF COMMENT**

### **Comments:**

We received a notice via email Enbridge Gas is approaching the Ontario Energy Board to raise their rates as of Jan. 2026. As homeowners, we have been checking our meter readings and submitting it to Enbridge via email. Previous to this, Enbridge used to send out their own employee to check the meter readings. I presume this resulted in a cut back of Enbridge staff whose job was no longer required since property owners were submitting the meter readings. Since Enbridge is saving money by reducing their staff, I feel that price increase in gas is not warranted.
