

LETTER OF COMMENT

Comments:

Rates are already too high. It's hard to decide between heating my home during the winter and having hot water OR Buyfoodfor my family Rates always go up but never come down. Why do I get a charge for being a customer? Gas comes in the existing piping /delivery system for the past 40 years. Why do I getadelivery charge and storage fee. This is just wrong. The cost is one price and the rest is an exsiting delivery never gets changed or upgraded while it works. There should be more control over what can be billed
