

LETTER OF COMMENT

Comments:

I am strongly against the 18% proposed increase in service fees. As confirmed this month by an Enbridge support agent, my July bill of \$29.87 consisted entirely of service fees, since the meter reading for my unit showed 0 gas usage. An increase to \$35.24 in residential service fees for Union South is completely unacceptable, as Enbridge is not providing me a service and has been billing me for the last few months entirely on fees. The pursuit of an 18% service fee increase, given Canada's current unemployment rate and challenging economic climate, burdens me and other Canadians. Thank you for your consideration, and I am hopeful that this monthly drastic rate increase will not be approved.
