

LETTER OF COMMENT

Comments:

I reside within the Union South Rate Zone. The Notice of A Rate Hearing indicates that the residential rate will be \$35.24 as of 2026. The current rate on my bill displays a gas supply rate of \$18.8146. The net difference would be almost a 100% increase in the rate hike. How is this justifiable given Enbridge reported a net income of \$1.575 billion in profit in 2025 which is a 49% increase year over year citing inflation as the culprit for the rate increase? Also, is the rate hike of 100% correct or am I calculating it wrong. Why do we pay an ongoing monthly recurring fee of around \$27 for meter maintenance, customer service, and 24/7 emergency when I have not used any of these services. In addition, there is no such thing as meter maintenance in my subdivision. Why are we customers charged these bogus fees. Why is there an ongoing gas “delivery” charge when gas delivery is automatic, not requiring the actual gas to be delivered manually to my location. Seems like a legitimized scam to increase your profits and keep shareholders happy.

Name: Mike Kosek

Do you reside in the impacted service area?: Yes
