

Entegrus Powerlines Inc.

**Application for electricity distribution rates and other
charges beginning May 1, 2026**

PROCEDURAL ORDER NO. 1

October 14, 2025

Revised October 15, 2025

Entegrus Powerlines Inc. (Entegrus Powerlines) filed a cost of service application with the Ontario Energy Board (OEB) on August 28, 2025, under section 78 of the *Ontario Energy Board Act, 1998*, seeking approval for changes to the rates that Entegrus Powerlines charges for electricity distribution, beginning May 1, 2026.

The application will be heard by commissioners: Robert Dodds (presiding), Vinay Sharma and Shahrzad Rahbar.

A Notice of Hearing was issued on September 19, 2025. To date, the OEB has received over 65 letters of comment from Entegrus Powerlines customers. The letters have been placed on the record of this proceeding and are publicly available on the OEB's website. Entegrus Powerlines is required to address the issues raised in letters of comment by way of a document filed with the OEB before the record of this proceeding is closed.

School Energy Coalition (SEC) and Vulnerable Energy Consumers Coalition (VECC) applied for intervenor status and cost eligibility.

No objection was received from Entegrus Powerlines.

SEC and VECC are approved as intervenors and are eligible to apply for an award of costs under the OEB's [Practice Direction on Cost Awards](#). The list of parties in this proceeding is attached as Schedule A to this Procedural Order.

Cost eligible intervenors should be aware that the OEB will not generally allow the recovery of costs for the attendance of more than one representative of any party unless a compelling reason is provided when cost claims are filed.

Being eligible to apply for recovery of costs is not a guarantee of recovery of any costs claimed. Cost awards are made by way of OEB order at the end of a hearing.

Issues List

OEB staff will canvas parties for any unique issues that warrant addition to the standard [Issues List](#) for electricity distribution rate applications. If parties recommend and agree to revisions, OEB staff will file a revised draft Issues List with the OEB. If there is no agreement on whether the standard Issues List should be revised, OEB staff will advise the OEB in writing. If intervenors and the applicant do not propose any amendments to the standard Issues List, OEB staff will notify the OEB of this fact. The OEB will approve an issues list prior to the filing of interrogatories.

Interrogatories

At this time, provision is being made for written interrogatories. In preparing interrogatories, parties should refer to the OEB's approved Issues List. Parties should consult sections 26 and 27 of the OEB's [Rules of Practice and Procedure](#) regarding required naming and numbering conventions and other matters related to interrogatories. The OEB will review the single test year application both in the context of the projects and programs that are requested for the test year and from the perspective of the distributor's plans for the subsequent four years until the next scheduled rebasing application.

Parties should examine the value presented by the proposed investments as opposed to focusing only on the costs. Parties should also assess the fit between the applicant's plans and its stated objectives and consider how the plans contribute to positive outcomes for customers, in particular those outcomes that arise from the asset management decisions reflected in the applicant's distribution system plan. The OEB will consider the entire five-year distribution system plan to assess the planning and pacing proposals of the applicant and whether the test year requests are appropriately aligned with the distribution system plan. The OEB will also consider productivity and benchmarking results in assessing cost forecasts, bill impacts and distributor performance.

Parties should not engage in detailed exploration of items that do not appear to be material. Parties should use the materiality thresholds documented in Chapter 2 of the Filing Requirements as a guide. In making its decision on cost awards, the OEB will consider whether intervenors made reasonable efforts to ensure that their participation in the hearing was focused on material issues.

Presentation of Settlement Proposal

The OEB is making provision for a settlement conference. Following the settlement conference, provision is being made for the filing of letters informing the OEB of the

status of the settlement discussions, the presentation of any settlement proposal filed by Entegrus Powerlines, whether full or partial, and for the presentation of any unsettled issues to be adjudicated by the OEB. Entegrus Powerlines' presentation is intended to summarize and provide any salient information for the OEB's consideration in reviewing the settlement proposal.

The OEB is making provision for the following related to this proceeding. Further procedural orders may be issued by the OEB.

THE ONTARIO ENERGY BOARD ORDERS THAT:

If OEB staff or intervenors intend to submit clarification questions to Entegrus Powerlines as part of the settlement process, they are encouraged to submit these questions as far in advance as possible of the commencement of the settlement conference, in the interests of making the settlement process as efficient as possible.

9. The OEB is setting a tentative date of **February 2, 2026 at 9:30 am** for Entegrus Powerlines to present to the OEB any settlement proposal and a summary of any unsettled issues in the case. OEB staff will, at the direction of the OEB, confirm or amend this date in subsequent correspondence.
