**EB-2025-0014 - Oshawa PUC Networks Inc. (Oshawa Power) Application for 2026 Distribution Rates
Pollution Probe Hearing Estimate**

Dear Mr. Murray:

Pollution Probe estimates 60 minutes of time required for the oral hearing and this will be allocated to the issues for Panel 1 as outlined by Oshawa Power. Pollution Probe will have a primary focus on Capital, Rate base and OM&A. Placing Pollution Probe toward the end of the schedule order would help us stay within the time estimate and minimize duplication.

Pollution Probe also agrees with the School Energy Coalition's proposal that cross-examination be organised by subject area (using the list provided by the OEB in Procedural Order No. 5) to cover the issues in a logical order. This approach appears to be the most efficient.

Respectfully submitted on behalf of Pollution Probe.
