

Intervention Form

Case Number:

EB-2025-0268

Requesting information on behalf:

Of an organization

Intervenor Name:

Screaming Power Inc.

Mandate and Objectives:

Screaming Power Inc. is a Canadian energy software, services and data consultant company focused on digital customer engagement, utility system transparency, and distributed energy resource DER integration. As the EB2025-0268 proceeding involves a comprehensive review of DER compensation and delivery rates, our organization has a direct interest in ensuring that the valuation framework supports innovation, fair market access, and consumer empowerment.

Membership of the Intervenor and Constituency Represented:

We intend to represent private industry, innovators and the energy consumer overall. There are very few other parties that have our expertise and can do it in Ontario. As an expert in data access, data rights and inter-connectivity standards and policies, we are known by the OEB, market players and the Ministry of Energy as a party that has done this before in an unbiased way. We have the expertise to assist and we have a proven track record in achieving results

going back to wholesale market which opened in 2002.

Programs or Activities Carried Out by the Intervenor:

we are: Advocating for consumer data rights and fair competition, particularly in relation to utility affiliates and exclusive partners entering the software, data and DER market. Review situations regarding monopolistic practices, data governance, standards and potential data roadblocks that are tied to market operation concerns at the IESO, DSO, Utility DER, VPP and consumer level.

Governance Structure:

Lead by a business manager which will be supported by issue and task tracking software; Review and comment on consultation materials and submissions. Provide written feedback and expert analysis. Participate in stakeholder meetings and workshops. Offer insights on data governance, rate structures, and DER integration from a software and consumer advocacy standpoint. Assist the Board, DERs and Utilities in understanding the implications of DSO and DER development on software innovation and consumer data rights. Advise on technical, and policy around DER's.

OEB Proceedings:

Item Description	Category	Status
EB-2025-0060	OEB Consultations - Electricity	Denied

Issues:

Screaming Power intends to apply for recovery of its costs reasonably incurred in the course of its intervention in this matter. Screaming Power has unique expertise and has participated in many matters in Ontario related the data standards and data access for the last 20+ years and we wishes to be paid its reasonably incurred costs in all matters related to this request.

Policy Interests:

We have been directly and indirectly involved on policies and regulation, testing, operations and best practices. We wish to assist in potential changes to the Retail Settlement Code, Affiliate Code and other proceedings that will relate to fair market competition and consumer data rights.

Hearings:

We believe there is a need to have data access, data connectivity and data standardization between market participants. This data issue has greatly impeded market competition and market operations in Ontario in the past and has been directly related to the inability for Ontario to provide unbiased access to a fair and competitive market setting.

Evidence:

We intend to provide evidence and are looking for a cost award. We have the expertise and

experience in Ontario to do so. We have a unique perspective as we have been heavily involved with existing data and inter connectivity standards as a creator, advisor and or implementer of data connectivity between market players and competitors.

Coordination with Other Intervenors:

We intend to reach out to the other intervenors and have already started to establish an opportunity to engage with smaller SME's and larger Not For Profits that are potentially effected by the outcomes of this matter.

Cost Awards:

Screaming Power has unique expertise that needs to be provided to the consultation. This expertise and the experts required will be taken away from other activities that generate revenue for the company and assist the market in other matters related to fair operations and inter-connectivity between market players. Screaming Power has been involved in Chairing working Groups and driving results for OEB policy, regulatory and other initiatives as volunteers which the OEB, private industry and Utilities are aware of. These volunteer hours relate to 1000's of hours helping drive change for Ontario. For Screaming Power to provide this service with the expertise is needed, it doesn't want to be further financially penalized while most others have financial relief.
