## LETTER OF COMMENT

### Comments:

Dear Ontario Energy Board, I am a residential customer of Alectra Utilities in Brampton, and I am concerned about the proposed rate increase effective January 1, 2027. Alectra's notice says a typical 750 kWh household will see an \$11.55 monthly increase, but my home uses about 1,300 kWh per month, largely because I charge an electric vehicle daily. Based on the proposed change, my bill could rise by around \$20–25 per month, which is significant given the high cost of living. These increases also risk discouraging the use of electric vehicles — something the province has encouraged to meet clean energy goals. I urge the OEB to carefully consider how higher-usage customers, especially EV owners, will be affected and to require Alectra to provide mitigation options or fairer rate structures. Thank you for the opportunity to comment.
