**Subject:** Concerns regarding Alectra Utilities Corporation's rate increase for file number: EB-2025-0252

Hello Ontario Energy Board,

I am writing to show my concerns regarding the proposal to increase the rate of electricity. I am a resident of Brampton and is already facing the high cost of living and much higher cost of auto insurance and even the gas prices are higher than some other cities. Currently, everyone is facing economic crises, job insecurities and higher taxes and people are struggling to make both ends meet. Having said that, increasing electricity cost adds additional burden. Also why the rate increase for Brampton is way more than the other zones? And also the Delivery charges should be lowered as for this month I am paying almost same money for the delivery as for the usage, this is ridiculous.

So I do not support this rate increase and request the Ontario Energy Board to be mindful of the financial situation of the people and decline this rate increase application and help the people.

*Kind regards,*

R [REDACTED] S.
