LETTER OF COMMENT

Comments:

At a time in our life when people can scarcely afford groceries, an ongoing tariff war, lots of businesses closing and a weakened dollar, a request for increase in electricity rates, something i cannot live without in a country with changing temperatures is not just profit seeking but inhumane. I am certain the company is not operating at a loss, not with a reported a consolidated net income of \$167 million for the year ended December 31, 2024. I'm certain rate increases can be looked into again in the future however now is not the time for same. There are soo struggles in a regular household nowadays and having to decided between keeping the electricity on over buying sufficient groceries should not be one of the. I firmly reject the request and hope the board does as well

Name: Sharonee Anderson
