DECISION AND ORDER

EB-2025-0281

GC KENTUCKY SOLAR CORPORATION

Application for an Electricity Generation Licence

BY DELEGATION,

BEFORE: **Brian Hewson**
Vice President,
Consumer Protection & Industry Performance

December 11, 2025

DECISION AND ORDER

GC Kentucky Solar Corporation filed an application with the Ontario Energy Board (OEB) on October 2, 2025, under section 60 of the *Ontario Energy Board Act, 1998* (OEB Act) for an electricity generation licence.

This Decision and Order is being issued by the Delegated Authority, pursuant to Section 6 of the OEB Act. The Delegated Authority has considered the application without holding a hearing pursuant to section 6(4) of the OEB Act.

The applicant has stated that it plans to own and operate one solar generation facility located in East Gwillimbury, Ontario. Construction of the facility will begin in Spring 2026, and it is expected to commence commercial operation by Fall 2026.

After considering the application and assessing the technical capability and financial viability of the applicant, the OEB finds that it is in the public interest to grant the application and issue an electricity generation licence to GC Kentucky Solar Corporation. However, as the applicant has not yet constructed the facility and considering that it does not expect to commence commercial operation until Fall 2026, the OEB's approval in this Decision and Order shall not take effect until the applicant files written evidence with the OEB confirming completion of construction of the facility and readiness to commence commercial operation. Once the OEB receives the written confirmation an electricity generation licence will be issued to GC Kentucky Solar Corporation.

IT IS ORDERED THAT:

1. Subject to paragraph 2 below, the application by GC Kentucky Solar Corporation for an electricity generation licence is approved.
2. The electricity generation licence shall not be issued or take effect until GC Kentucky Solar Corporation advises the OEB, in writing, that the facility described in its application, and summarized in the Decision and Order, has been constructed and is ready to commence commercial operation.

DATED at Toronto December 11, 2025
