**Sent by EMAIL, RESS e-filing**

Mr. Ritchie Murray  
Acting Registrar  
Ontario Energy Board  
27-2300 Yonge Street  
Toronto, ON M4P 1E4

Dear Mr. Murray:

**Re: EPCOR Natural Gas Limited Partnership (“ENGLP”)  
EB-2025-0318 Quarterly Rate Adjustment Mechanism (“QRAM”) Application  
Aylmer Service Territory - Rates effective January 1, 2026 - revised**

---

In response to the amended application filed by Enbridge Gas on December 18 2025, please find enclosed ENGLP Aylmer’s *second revised* QRAM Application to the Ontario Energy Board for orders effective January 1, 2026.

The updated relevant M9 rates from Enbridge include:

<b>M9</b>	<b>ORIGINAL</b>	<b>EGI UPDATE</b>	<b>Variance</b>
Gas Supply Commodity Charge	\$0.204037	\$0.204037	\$0.000000
Rate Rider C	(\$0.017001)	(\$0.011703)	\$0.005298
Rate Rider E	<u>\$0.000000</u>	<u>\$0.000000</u>	<u>\$0.000000</u>
Total	<u>\$0.187036</u>	<u>\$0.192334</u>	<u>\$0.005298</u>

This has led to a revision in the PGCVA reference price and gas supply charge included in this application.

	<b>ORIGINAL</b>	<b>STAFF IR</b>	<b>EGI UPDATE</b>
	10-Dec	15-Dec	19-Dec
PGCVA Reference Price	\$0.185357	\$0.185165	\$0.190350
GPRA Recovery Rate	<u>(\$0.003992)</u>	<u>(\$0.003992)</u>	<u>(\$0.003992)</u>
Gas Commodity Charge	\$0.181365	\$0.181173	\$0.186358

Sincerely,

Tim Hesselink, CPA  
Senior Manager, Regulatory Affairs  
EPCOR Natural Gas Limited Partnership

## ONTARIO ENERGY BOARD

**IN THE MATTER OF** the *Ontario Energy Board Act, 1998*, S.O. 1998, c.15 (Schedule B), as amended (the “Act”);

**AND IN THE MATTER OF** an Application by EPCOR Natural Gas Limited Partnership (“ENGLP”) pursuant to Section 36(1) of the Act, for an order or orders approving or fixing just and reasonable rates and other charges for the sale, distribution, transmission and storage of gas as of January 1, 2026

**AND IN THE MATTER OF** the Quarterly Rate Adjustment Mechanism (“QRAM”).

### APPLICATION

1. As part of the EB-2025-0263 Decision and Rate Order dated September 23, 2025, the Ontario Energy Board (“Board”) approved a PGCVA reference price of \$0.166755 per m<sup>3</sup>, a GPRA recovery amount of \$0.001381 per m<sup>3</sup>, and a gas commodity charge of \$0.168136 per m<sup>3</sup>, all effective October 1, 2025 on an interim basis.
2. Based on actual and forecast natural gas prices for the January 2025 through December 2025 period, the PGCVA balance is projected to be a charge of approximately \$3.07 per residential customer.
3. ENGLP has filed its evidence based on the gas commodity charges that result from the revised Enbridge Gas Inc. EB-2025-0308 January 1, 2026 QRAM application dated December 18, 2025.
4. ENGLP hereby applies to the Board for further orders effective January 1, 2026:
  - a. An order changing the reference price authorized by the Board’s EB-2025-0263 Decision and Rate Order for use in determining the amounts to be recorded in the Purchased Gas Commodity Variance Account (Account No. 179-27) by \$0.023595 per m<sup>3</sup> from the Board approved level of \$0.166755 per m<sup>3</sup> to \$0.190350 per m<sup>3</sup>;

- b. An order changing the recovery amount authorized by the Board’s EB-2025-0263 Decision and Rate Order for use in clearing the amounts in the Gas Purchasing Rebalancing Account (GPRA) by  $-\$0.005373$  per  $\text{m}^3$  from the Board approved level of  $\$0.001381$  per  $\text{m}^3$  to  $-\$0.003992$  per  $\text{m}^3$ ;
- c. An order changing the rates and other charges from those authorized by the Board’s EB-2025-0263 Decision and Rate Order to reflect an increase of  $\$0.018222$  per  $\text{m}^3$  in the gas supply charge from the Board approved level of  $\$0.168136$  per  $\text{m}^3$  to a projected cost of  $\$0.186358$  per  $\text{m}^3$ . These changes are the sum of the change in the PGCVA reference price, the change required to prospectively clear the balance of the Gas Purchase Rebalancing Account.
- d. Such further Order or Orders as ENGLP may request and the Board may deem appropriate or necessary.

### **Regulatory Framework**

1. This application is supported by written evidence that has been pre-filed with the Board and interveners of record in proceedings EB-2024-0130.
2. Pursuant to the criteria established in the Board’s EB-2008-0106 Decision, below is the Board’s direction with respect to the timeline for processing the application
  - Any responsive comments from interested parties are filed with the Board, and served on ENGLP and other interest parties, on or before 4:45 p.m. two business days following the filing of the QRAM application.
  - Any reply comments from ENGLP are filed with the Board, and served on all interested parties, on or before 4:45 p.m. two business following receipt of comments.
3. ENGLP respectfully requests the Board issue its Decision and Order by December 24, 2025 for implementation effective January 1, 2026.
4. The following procedures are prescribed for cost claims relating to QRAM applications, as directed by the Board:

- Parties that meet the eligibility criteria contained in the Board’s Practice Direction on Cost Awards may submit costs with supporting rationale as to how their participation contributed to the Board’s ability to decide on this matter.
- Any party eligible for an award of costs must file a claim with the Board and ENGLP no later than ten days from the date of the Board’s decision and order. Should ENGLP have any comments concerning any of the claims, these concerns shall be forwarded to the Board and to the claimant within seven days of receiving the claims. Any response to ENGLP’s comments must be filed with the Board and ENGLP within seven days of receiving the comments.

**Address for Service**

5. ENGLP requests that all documents in relation to the Application and its supporting evidence, including responsive comments of any interested party, be served as follows:

DATED the 19<sup>th</sup> day of December, 2025.

**EPCOR Natural Gas Limited Partnership**

---

Senior Manager, Regulatory Commercial Services

1 **SCHEDULE 1- Management Summary**

2  
3 **EPCOR NATURAL GAS LIMITED PARTNERSHIP**

4  
5 **A. INTRODUCTION**

6  
7 As part of the EB-2025-0263 Decision and Rate Order dated September 23, 2025, the Ontario  
8 Energy Board (“Board”) approved a Purchased Gas Commodity Variance Account (“PGCVA”)   
9 reference price of \$0.166755 per m<sup>3</sup> and a gas commodity charge of \$0.168136 per m<sup>3</sup>, both  
10 effective October 1, 2025 for EPCOR Natural Gas Limited Partnership (“ENGLP”) on an interim  
11 basis.

12  
13 In RP-2002-0147/EB-2003-0286 (Accounting Order dated January 30, 2004), the Board  
14 approved a Gas Purchase Rebalancing Account (“GPRA”) to record the increase (decrease) in  
15 the value of the gas inventory available for sale to sales service customers due to changes in  
16 ENGLP’s PGCVA reference price. In EB-2025-0263, the Board approved a GPRA rate of  
17 \$0.001381 per m<sup>3</sup>.

18  
19 ENGLP is proposing to adjust the gas supply charge, the GPRA rate and the PGCVA reference  
20 price effective January 1, 2026 to reflect an updated forecast of gas costs, the projected balance  
21 in the PGCVA and the projected balance in the GPRA.

22  
23 **B. PURCHASED GAS COMMODITY VARIANCE ACCOUNT**

24  
25 Updated Forecasts

26 Based on actual and forecast costs, the PGCVA account balance totals a charge of \$3.07 per  
27 average residential customer for the twelve-month period ending December 2025 (Schedule 2).

28  
29 The current forecast reflects the forecast for natural gas prices over the relevant period. These  
30 gas prices reflect current contracts and current market conditions, including alternative energy

1 prices, demand for natural gas, the weather outlook and the impact of current storage levels.  
2 These impacts are reflected in the concurrent EB-2025-0308 QRAM application revised  
3 December 18, 2025 for the Union South rate zone filed by Enbridge Gas Inc. (“Enbridge”).  
4

5 The PGCVA balance has been calculated using the most recent information available, including  
6 actual volumes and costs through October 2025. The remaining months in the twelve-month  
7 period ending December 2025 are calculated using estimated prices and volumes based on the  
8 best information available at the time of filing.  
9

10 Forecast prices have been used for the period January 2026, through December 2026 period, and  
11 reflect the prices that result from existing contracts that are currently in place.  
12

### 13 **C. GAS SUPPLY PORTFOLIO**

14

15 The gas supply portfolio reflects the current and forecasted mix of delivery points utilized by  
16 ENGLP for system gas purchases. In particular, the gas supply portfolio reflected in this QRAM  
17 application reflects the Detailed Supply/Demand Forecast found in Appendix C to ENGLP’s  
18 Annual Gas Supply Plan Update (EB-2025-0140) filed on April 30, 2025. This is consistent  
19 with the intention that QRAM filings would reflect and align with the most recent gas supply  
20 plan filing that has been reviewed by the Board.  
21

22 ENGLP’s gas supply portfolio continues to include system gas purchases from Enbridge and  
23 from a local producer. In addition, beginning in July 2023, ENGLP began purchasing renewable  
24 natural gas (“RNG”) from a local producer located in its franchise area.  
25

26 ENGLP is a system gas customer on the Enbridge system on behalf of its own system gas  
27 customers. ENGLP continues to have direct purchase customers on its system and continues to  
28 ensure that they continue to balance their supply with their demand. In addition to the system  
29 gas purchased from Enbridge noted above, ENGLP purchases gas from a local producer in its  
30 franchise area. The monthly purchases for each of the sources of supply are consistent with the

1 figures in the annual gas supply update that was filed with the Board on April 30, 2025 (EB-  
2 2025-0140) as noted above, without exception.

3  
4 The composition of the gas supply portfolio volumes for the January 2025 through December  
5 2025 period is shown on the top of Schedule 3. This schedule shows the monthly volume of gas  
6 purchased or forecast to be purchased from the local producers and from Enbridge. Similarly,  
7 the composition of the gas supply portfolio volumes for the January 2026 through December  
8 2026 period is shown on the top of Schedule 6.

9  
10 **D. HISTORICAL GAS COSTS**

11  
12 ENGLP's actual and forecast gas costs for the January 2025 through December 2025 period, by  
13 source of supply, are shown in Schedule 4 in \$/GJ. These prices are also shown in the middle  
14 section of Schedule 3 in \$/m<sup>3</sup>. The bottom section of Schedule 3 shows the composition of the  
15 total system gas costs. The conversion factor used to convert \$/m<sup>3</sup> to \$/GJ is based on the heat  
16 values used by Enbridge in their calculation of ENGLP's Banked Gas Account balances. These  
17 conversion factors are shown in Schedule 4. All prices and costs shown are actual prices paid in  
18 January 2025 through December 2025. Prices for the remaining months in this period are based  
19 on estimated prices to be paid in those months. The costs shown for these remaining months are  
20 based on both the estimated prices to be paid and the estimated volumes to be purchased.

21  
22 **Enbridge Gas Inc. System Gas Pricing**

23 Prices paid to Enbridge are based on the Board approved Union South Total Gas Supply  
24 Commodity Charge for Utility Sales.

25  
26 **Local Production (A)**

27 ENGLP has not purchased any gas under the Local Production (A) since the contract expired at  
28 the end of September, 2020. Therefore, as shown in Schedules 3 and 6, volumes, prices and  
29 costs associated with Local Production (A) are shown as zero for all months shown in those  
30 schedules.

1 Local Production (B)

2 ENGLP entered into an Amending Agreement dated January 25, 2021 to the gas purchase  
3 contract noted above (that covered both Local Production (A) and (B) volumes) for this gas based  
4 on a pricing mechanism similar to that paid for Local Production (C) as explained below.  
5 Specifically, the commodity rate for this gas is calculated based on both the difference in the  
6 energy content of the gas purchased from Lagasco relative to that of the gas delivered by  
7 Enbridge, and the sum of the Enbridge total gas supply commodity charge and the Board  
8 approved delivery commodity charge paid to Enbridge. These charges are found in Schedule  
9 “A” to the Enbridge Union South rate schedules and in Enbridge’s M9 rate schedule,  
10 respectively. A 5% discount is applied to the total gas supply commodity charge (inclusive of  
11 commodity rate adjustments) from Enbridge for all gas delivered to ENGLP under this contract.  
12 The formula used to determine the price to paid for this gas is:

13  
14 
$$\text{Price } (\$/\text{m}^3) = \text{Local Producer Heat Content}/\text{Enbridge Heat Content} \times ((\text{Enbridge Total Gas}$$
  
15 
$$\text{Supply Commodity Charge} \times 0.95) + \text{Enbridge M9 Delivery Commodity Charge}).$$
  
16

17 ENGLP notes that unlike the Local Production (C) pricing described below, there is no firm  
18 contract demand charge associated with the Local Production (B) gas.

19  
20 The Amending Agreement had a term to September 30, 2023. A Second Amending Agreement  
21 was put in place near the end of September, 2023 that covered the production in October, 2023.  
22 A Third Amending Agreement was signed in late October, 2023 that has a term to October 31,  
23 2024. A Fourth Amending Agreement was signed in late October, 2024 that has a term to  
24 October 31, 2026. There are no changes to the pricing formula from that in the original  
25 Amending Agreement. For forecasting purposes for the October 2025 through September 2026  
26 period, ENGLP has assumed that the pricing mechanism in the current contract remains in place  
27 for this period.

28  
29  
30

1 Local Production (C)

2 ENGLP entered into a contract with a local gas producer (Lagasco) for volumes to be purchased  
3 and delivered to its franchise area. The required Lagasco and ENGLP facilities were completed  
4 in late December, 2019 and the gas began flowing under this contract on December 23, 2019.  
5 The gas purchase contract has a primary term which expires on October 31, 2023. An Amending  
6 Agreement was put in place near the end of October, 2024 that covered the production to October  
7 31, 2026. These volumes are shown in Schedules 3 and 6 as Local Production (C). The  
8 Amending Agreement includes a firm contract demand of 1,800 GJ/day.

9  
10 The commodity rate for this gas is calculated based on both the difference in the energy content  
11 of the gas purchased from Lagasco relative to that of the gas delivered by Enbridge, and the  
12 Enbridge total gas supply commodity charge. This charge is found in Schedule “A” to the  
13 Enbridge Union South rate schedules. A 5% discount is applied to the total gas supply  
14 commodity charge from Enbridge for all gas delivered to ENGLP up to the firm contract demand  
15 of 1,800 GJ/day. The formula used to determine the price to paid for this gas is:

16  
17 
$$\text{Price (\$/m}^3\text{)} = \text{Local Producer Heat Content/Enbridge Heat Content} \times \text{Enbridge Total Gas Supply}$$
  
18 
$$\text{Commodity Charge} \times 0.95.$$

19  
20 The actual price paid will reflect Enbridge’s Board approved total gas supply commodity charge  
21 and the actual heat content for both the Enbridge gas and the Lagasco gas. ENGLP notes that  
22 there will be a true up of the cost due to Lagasco invoicing ENGLP based on the forecast  
23 Enbridge heat content each month as the actual heat content is not available from Enbridge at  
24 the time the invoice is prepared. This cost difference, which ENGLP believes will continue to  
25 be small relative to the overall cost of the gas each month, will continue to be reflected as an  
26 adjustment in subsequent invoices and is done on a quarterly basis. These quarterly adjustments  
27 will continue to be reflected in the PGCVA calculations in the month in which the adjustment is  
28 reflected in the invoices.

29

1 As a result of the above adjustments, the actual monthly historical prices will not exactly match  
2 what would be generated by the above formula using the actual Enbridge heat content.

3  
4 For any gas delivered in excess of the firm contract demand of 1,800 GJ/day delivered, the 5%  
5 discount will not apply to the price to be paid, and there will not be any incremental demand  
6 charges and no overrun charges.

7  
8 In addition to the above commodity price, ENGLP pays the local producer a delivery charge and  
9 a demand charge for the delivery of the gas into the distribution system up to 1,800 GJ/day.  
10 These charges are equal to the corresponding charges paid to Enbridge under the M9 rate  
11 schedule, adjusted for the relative difference in the heat content of the gas delivered. This  
12 adjustment for the relative difference in the heat content ensures that the cost associated with the  
13 delivery charges and demand charges paid to the local producer are equal to the cost reductions  
14 that will be experienced on the Enbridge system. These costs are tracked through ENGLP's  
15 Purchased Gas Transportation Variance Account ("PGTVA"). ENGLP assesses its contract  
16 demand with Enbridge annually, to take effect November 1 of each year.

17  
18 ENGLP has maintained its level of contract demand from Enbridge for the year beginning  
19 November 1, 2024 at the same level as in the previous year. ENGLP has also forecast that this  
20 level would be maintained through to the end of 2024. The addition of the firm local production  
21 and RNG has allowed for the continuing growth in customer attachments without any increased  
22 cost associated with a higher contract demand on the Enbridge system.

23  
24 RNG Pricing

25 ENGLP has finalized the agreement with respect to the RNG purchases that began in July 2023.  
26 The contract has a term of 10 years. The price paid for this gas is equal to the Enbridge gas  
27 supply commodity rate plus the Enbridge M9 delivery commodity charge, adjusted for the  
28 difference in energy content. The formula used to determine the price to paid for this gas is:

29

1 Price (\$/m<sup>3</sup>) = RNG Producer Heat Content/Enbridge Heat Content x (Enbridge Total Gas  
2 Supply Commodity Charge + Enbridge M9 Delivery Commodity Charge).

3

4 Local Production (E)

5 ENGLP entered into a contract with a local gas producer Clearbeach Resources Inc.  
6 (“Clearbeach” – an affiliated company of Lagasco) for volumes to be purchased and delivered  
7 to its franchise area. The required Clearbeach and ENGLP facilities were completed and are  
8 planning to flow gas under this contract beginning December 2024. The gas purchase contract  
9 has a primary term which expires on October 31, 2035. These volumes are shown in Schedule 6  
10 along with Lagasco under Local Production (C) to be consistent with 2024 Gas Supply Plan.  
11 The Amending Agreement includes a firm contract demand of 466 GJ/day.

12

13 The commodity rate for this gas is calculated based on both the difference in the energy content  
14 of the gas purchased from Clearbeach relative to that of the gas delivered by Enbridge, and the  
15 Enbridge total gas supply commodity charge. This charge is found in Schedule “A” to the  
16 Enbridge Union South rate schedules. The formula used to determine the price to pay for this  
17 gas is:

18

19  $Price (\$/m^3) = Local\ Producer\ Heat\ Content / Enbridge\ Heat\ Content \times Enbridge\ Total\ Gas\ Supply$   
20  $Commodity\ Charge.$

21

22 The actual price paid will reflect Enbridge’s Board approved total gas supply commodity charge  
23 and the actual heat content for both the Enbridge gas and the Clearbeach. ENGLP notes that  
24 there will be a true up of the cost due to Clearbeach invoicing ENGLP based on the forecast  
25 Enbridge heat content each month as the actual heat content is not available from Enbridge at  
26 the time the invoice is prepared. This cost difference, which ENGLP believes will continue to  
27 be small relative to the overall cost of the gas each month, will continue to be reflected as an  
28 adjustment in subsequent invoices and is done on a quarterly basis. These quarterly adjustments  
29 will continue to be reflected in the PGCVA calculations in the month in which the adjustment is  
30 reflected in the invoices.

1 As a result of the above adjustments, the actual monthly historical prices will not exactly match  
2 what would be generated by the above formula using the actual Enbridge heat content.

3  
4 In addition to the above commodity price, ENGLP pays the local producer a delivery charge and  
5 a demand charge for the delivery of the gas into the distribution system up to 466 GJ/day. These  
6 charges are equal to the corresponding charges paid to Enbridge under the M9 rate schedule,  
7 adjusted for the relative difference in the heat content of the gas delivered. This adjustment for  
8 the relative difference in the heat content ensures that the cost associated with the delivery  
9 charges and demand charges paid to the local producer are equal to the cost reductions that will  
10 be experienced on the Enbridge system. These costs are tracked through ENGLP's Purchased  
11 Gas Transportation Variance Account ("PGTVA").

## 12 13 14 **E. FORECAST GAS COSTS**

15  
16 ENGLP's forecast gas costs for the January 2026 through December 2026 period, by source of  
17 supply, are shown in Schedule 7 in \$/GJ. These prices are also shown in the middle section of  
18 Schedule 6 in \$/m<sup>3</sup>. The bottom section of Schedule 6 shows the composition of the total system  
19 gas costs. The conversion factor used to convert \$/m<sup>3</sup> to \$/GJ is based on the heat values used  
20 by Enbridge in their calculation of ENGLP's Banked Gas Account balances. These conversion  
21 factors are shown in Schedule 7. The costs shown are based on both the estimated prices to be  
22 paid and the estimated volumes to be purchased.

23  
24 Forecast gas prices for each of the sources of supply for the January 2026 through December  
25 2026 period are described below.

### 26 27 **Enbridge Gas Inc. System Gas Pricing**

28 As noted earlier, ENGLP is a system gas purchaser on the Union Gas South (now Enbridge)  
29 system.

30

1 The price forecast for this gas reflects Enbridge's revised QRAM application in EB-2025-0308  
2 dated December 18, 2025, where the gas supply commodity charge with rate riders has been  
3 forecast as \$0.192334 per m<sup>3</sup> and is shown in the Enbridge Gas line on ENGLP's Schedule 6 and  
4 in \$/GJ on Schedule 7. The \$0.192334 per m<sup>3</sup> figure is taken from Enbridge's application on  
5 "Gas Supply Commodity Charge" line in page 199 of 267, "Union South Rate Class" for rate  
6 rider C Gas Cost Adjustment in page 236 of 267, and "Gas Supply Commodity Charge" for rate  
7 rider E Revenue Adjustment in page 242 of 267. This is Enbridge's Total Gas Supply  
8 Commodity Charge for Utility Sales in the Union South operating area.

9  
10 The Total Gas Supply Commodity Charge for Utility Sales in the Union South operating area  
11 also directly impacts the price paid for gas purchased from the local producer noted in Schedule  
12 6 under Local Production (B), Local Production (C) and RNG (see below).

13  
14 At the time this application was prepared the Enbridge gas supply commodity charge for January  
15 1, 2026 rates was not yet approved by the Board. Any differences between the applied for and  
16 Board approved gas supply commodity charge for Enbridge will be reflected in ENGLP's next  
17 QRAM application and evidence.

18  
19 Local Production (A)

20 As noted above, ENGLP no longer purchases any premium priced gas as the contract for this gas  
21 expired at the end of September, 2020.

22  
23 Local Production (B)

24 As noted above, the contract that covered the volumes under both Local Production (A) and  
25 Local Production (B) expired at the end of September, 2020. Further, as noted above in the Local  
26 Production (B) section of Historical Gas Costs, ENGLP entered into an Amending Agreement  
27 to this gas purchase contract for this gas based on a pricing mechanism similar to that paid for  
28  
29  
30

1 Local Production (C)

2 For volumes purchased for January 2026 through December 2026, and as noted above under  
3 Historical Gas Costs, the commodity rate forecast for this gas has been forecast based on both  
4 the difference in the energy content of the gas purchased from Lagasco relative to that of the gas  
5 delivered by Enbridge, and the sum of the Enbridge total gas supply commodity charge and the  
6 Board approved delivery commodity charge paid to Enbridge. These charges are found in  
7 Schedule “A” to the Enbridge Union South rate schedules and in Enbridge’s M9 rate schedule,  
8 respectively. A 5% discount is applied to the total gas supply commodity charge (inclusive of  
9 commodity rate adjustments) from Enbridge for all gas delivered to ENGLP. As noted above,  
10 there has been no change in the pricing formula in the new amending agreement that has a term  
11 to October 31, 2026. ENGLP has forecast the pricing methodology for this gas to be paid in  
12 January 2026 through December 2026 to be the same as that currently in place.

13  
14 This price is shown on Schedule 6 in the January 2026 through December 2026 columns in the  
15 row labelled Local Production (B). The discount applied to the Enbridge total gas supply  
16 commodity charge results in lower costs for ENGLP’s system gas customers. If the production  
17 from these wells, which are located within ENGLP’s distribution franchise area were curtailed,  
18 this locally produced gas would need to be replaced with additional supplies from Enbridge  
19 which would result in a higher gas commodity cost and higher delivery charges paid to Enbridge.  
20 It may also result in a higher demand charge paid to Enbridge.

21  
22 The inclusion of the Enbridge delivery commodity charge in the cost of the gas reflects the fact  
23 that the Local Production (B) gas, which is produced in the ENGLP franchise area, results in a  
24 direct reduction of the delivery commodity charge paid to Enbridge of the same amount as that  
25 paid to the local producer.

26  
27 Local Production (C)

28 As noted above under Historical Gas Costs, the commodity rate for this gas is calculated based  
29 on both the difference in the energy content of the gas purchased from Lagasco relative to that  
30 of the gas delivered by Enbridge, and the Enbridge total gas supply commodity charge. This

1 charge is found in Schedule “A” to the Enbridge Union South rate schedules. A 5% discount is  
2 applied to the total gas supply commodity charge from Enbridge for all gas delivered to ENGLP  
3 up to the firm contract demand of 1,800 GJ/day effective November 1, 2024. Any gas taken on  
4 any day in excess of the 1,800 GJ/day is paid at the Enbridge total gas supply commodity charge  
5 for Union South, with no discount applied. ENGLP has not forecast any excess gas to be  
6 purchased since the gas supply plan assumes normal weather conditions and is based on the firm  
7 contract demand that underlies the Local Production (C) volumes included in the plan. Any such  
8 excess volumes would be small relative to the total volumes and the price differential is not large  
9 enough to have a significant impact on the overall average monthly forecast of the price of the  
10 total system gas purchases.

11  
12 As noted above under Historical Gas Costs, there will be a true up of the cost due to Lagasco  
13 invoicing ENGLP based on the forecast Enbridge heat content each month as the actual heat  
14 content is not available from Enbridge at the time the invoice is prepared. This cost difference,  
15 which ENGLP believes will continue to be small relative to the overall cost of the gas each  
16 month, will continue to be reflected as an adjustment in subsequent invoices and is done on a  
17 quarterly basis. These quarterly adjustments will continue to be reflected in the PGCVA  
18 calculations in the month in which the adjustment is reflected in the invoices.

19  
20 RNG Pricing

21 For volumes purchased for January 2026 through December 2026, and as noted above under  
22 Historical Gas Costs, the commodity rate forecast for this gas has been forecast based on both  
23 the difference in the energy content of the gas purchased from the RNG producer relative to that  
24 of the gas delivered by Enbridge, and the sum of the Enbridge total gas supply commodity charge  
25 and the Board approved delivery commodity charge paid to Enbridge. These charges are found  
26 in Schedule “A” to the Enbridge Union South rate schedules and in Enbridge’s M9 rate schedule,  
27 respectively.

28  
29 This price is shown on Schedule 6 in the January 1, 2026 through December, 2026 columns in  
30 the row labelled RNG Production. The inclusion of the Enbridge delivery commodity charge in

1 the cost of the gas reflects the fact that the RNG gas, which is produced in the ENGLP franchise  
2 area, results in a direct reduction of the delivery commodity charge paid to Enbridge of the same  
3 amount as that paid to the local RNG producer.  
4  
5

#### 6 Local Production (E)

7 As noted above, the commodity rate for this gas is calculated based on both the difference in the  
8 energy content of the gas purchased from Clearbeach relative to that of the gas delivered by  
9 Enbridge, and the Enbridge total gas supply commodity charge. This charge is found in Schedule  
10 “A” to the Enbridge Union South rate schedules. ENGLP has not forecast any excess gas to be  
11 purchased since the gas supply plan assumes normal weather conditions and is based on the firm  
12 contract demand that underlies the Local Production (E) volumes included in the plan. Any such  
13 excess volumes would be small relative to the total volumes and the price differential is not large  
14 enough to have a significant impact on the overall average monthly forecast of the price of the  
15 total system gas purchases.  
16

17 As noted above under Historical Gas Costs, there will be a true up of the cost due to Clearbeach  
18 invoicing ENGLP based on the forecast Enbridge heat content each month as the actual heat  
19 content is not available from Enbridge at the time the invoice is prepared. This cost difference,  
20 which ENGLP believes will continue to be small relative to the overall cost of the gas each  
21 month, will continue to be reflected as an adjustment in subsequent invoices and is done on a  
22 quarterly basis. These quarterly adjustments will continue to be reflected in the PGCVA  
23 calculations in the month in which the adjustment is reflected in the invoices.  
24

#### 25 Other Forecast Assumptions

26 The heat value used to convert GJ to m<sup>3</sup> is 39.02 GJ/10<sup>3</sup> m<sup>3</sup> for gas delivered from Enbridge  
27 effective April 1, 2025. This is consistent with the figure used by Enbridge in their current  
28 QRAM application. It is found in Exhibit E, Tab 2, Schedule 1 in EB-2025-0308, at Note 1 and  
29 also noted in paragraph 4 of Exhibit D, Tab 2, Schedule 1. ENGLP uses this conversion factor

1 to calculate the cost in \$/GJ and for the pricing of the Local Production (B) gas, the Local  
2 Production (C) gas and the projected RNG volumes.

3  
4 Beginning in December, 2019, ENGLP required the use of a heat value in the pricing of the gas  
5 purchased from Local Production (C), as noted above. The heat value used to convert GJ to m<sup>3</sup>  
6 is forecast at 38.87 GJ/10<sup>3</sup> m<sup>3</sup> for gas delivered from Lagasco related to both the Local  
7 Production (C) and the Local Production (B) gas. This figure is representative of the actual heat  
8 values shown in Schedule 4. The initial heat value used to convert GJ to m<sup>3</sup> is forecast at 37.77  
9 GJ/10<sup>3</sup> m<sup>3</sup> for RNG gas delivered into the ENGLP system and is based on the actual heat content  
10 of the RNG for July, 2023. Effective December 1, 2023, the heat value used to convert GJ to m<sup>3</sup>  
11 is 37.61 GJ/10<sup>3</sup> m<sup>3</sup> based on the actual tests. The Enbridge, Lagasco and RNG heat value  
12 forecasts are shown in Schedule 7.

## 13 14 **F. PGCVA RATE CHANGES**

### 15 16 Historical PGCVA Balance

17 The projected December 2025 balance in the PGCVA is a credit of \$47,054.53 including a credit  
18 of \$65,496.22 in accumulated interest, based on the Board's prescribed interest rate. This  
19 estimate is based on actual and forecasted purchases and the balance brought forward from  
20 December, 2024. The PGCVA debit amounts to a charge of approximately \$3.07 for a typical  
21 residential customer consuming approximately 2,099 m<sup>3</sup> per year. These figures are shown on  
22 Schedule 2.

### 23 24 Proposed PGCVA Rate Changes

25 ENGLP proposes to adjust the reference price effective January 1, 2026 based on the projected  
26 accumulated balance in the PGCVA as of the end of December 2026 and the forecasted cost of  
27 gas over the twelve-month period beginning January 2026 through December 2026. The  
28 reference price is set such that the projected PGCVA balance at the end of December 2026 is  
29 close to zero.

1 ENGLP’s proposal will clear the PGCVA balance on a prospective basis, eliminating the need  
2 for retroactive adjustments. This is consistent with ENGLP’s past proposals in QRAM  
3 applications, which have been accepted by the Board.

4  
5 ENGLP proposes to change the reference price by \$0.023595 per m<sup>3</sup> effective January 1, 2026,  
6 from \$0.166755 per m<sup>3</sup> to \$0.190350 per m<sup>3</sup>. The derivation of this rate is shown in Schedule  
7 5. This is the reference price required to bring the PGCVA balance close to zero on a twelve-  
8 month forecast basis. This change will also be reflected in the gas commodity charge.

9  
10 **G. GAS PURCHASE REBALANCING ACCOUNT**

11  
12 The impact on the GPRA of the proposed January 1, 2026 PGCVA reference price change from  
13 \$0.166755 per m<sup>3</sup> to \$0.190350 per m<sup>3</sup> is a charge of \$186,377.24, as shown on Schedule 8. This  
14 figure is shown in column (J) of Schedule 8 on the December, 2025 line. It is calculated as the  
15 change in the PGCVA reference price between December 2025 and January 2026, multiplied by  
16 the cumulative inventory balance at the end of December 2025. This cumulative inventory  
17 balance is the sum of the actual monthly inventory balances for October 2025 and forecasts for  
18 the two subsequent months. These forecasts will be replaced with actual balances for these  
19 months in subsequent QRAM applications as this information becomes available. As well, the  
20 monthly inventory balances are based on a deemed level of unaccounted for gas (“UFG”) of the  
21 total throughput volume, as shown in column (E) of Schedule 8. The 0.0% is the Board approved  
22 level of UFG from EB-2024-0130.

23  
24 ENGLP proposes to adjust the gas commodity charge effective January 1, 2026 based on the  
25 projected accumulated balance in the GPRA. The adjustment to the gas commodity charge will  
26 be set such that the projected GPRA balance at the end of December 2026 will be close to zero.  
27 The rate required to achieve this is shown in column (J) on Schedule 8. Column (P) shows the  
28 reduction of the inventory revaluation balance based on this rate of -\$0.003992 per m<sup>3</sup> over the  
29 January 2026 through December 2026 period.

1 ENGLP’s proposal will clear the GPRA balance on a prospective basis, eliminating the need for  
2 retroactive adjustments. This is consistent with ENGLP’s proposal for the continued prospective  
3 clearance of the PGCVA. This change will also be reflected in the gas commodity charge.  
4

## 5 **H. GAS COMMODITY CHARGE**

6  
7 The change in the gas commodity charge proposed for January 1, 2026 is summarized below.  
8 The change in the gas commodity charge reflects both the change in the PGCVA reference price  
9 and the change in the recovery of the inventory revaluation amount in the GPRA. It also reflects  
10 the approved system gas supply cost. The change in the gas commodity charge is as follows:  
11

	EB-2025-0263	Proposed	Variance
	01-Oct-25	01-Jan-26	
PGCVA Reference Price	\$0.166755	\$0.190350	\$0.023595
<u>GPRA Recovery Rate</u>	<u>\$0.001381</u>	<u>(\$0.003992)</u>	<u>(\$0.005373)</u>
Gas Commodity Charge	\$0.168136	\$0.186358	\$0.018222

## 12 13 **I. CUSTOMER IMPACTS**

14  
15 Schedule 9 provides a bill comparison showing the impact of the changes in the proposed gas  
16 commodity charge on a year over year basis for the appropriate quarter as well as the annual bill  
17 impact of the most recent quarterly change for an average residential customer.  
18

19 The annual bill impact related to the change in the commodity charges on a customer consuming  
20 approximately 2,065 m<sup>3</sup> is an increase of \$37.63, or 10.8%. The average use figure of 2,065 m<sup>3</sup>  
21 is consistent with the bill impacts in ENGLP’s EB-2024-0130 Cost of Service filing and reflects  
22 the Board’s expectation that QRAM applications would provide bill impacts based on this level  
23 for a typical residential customer.  
24

1 The total annual bill impact in the above scenario is an increase of \$17.33 or 1.8%, which also  
2 captures the Aylmer IRM approval<sup>1</sup> for rates also effective January 1, 2026. (Note the  
3 calculations of the total bill impact are based on a full 12 months, meaning the impacts of the  
4 deferred implementation are ignored to avoid understating the impact compared to the October  
5 2025 rates. As an example, referring to ENGLP’s EB-2024-0130 final continuity schedule<sup>2</sup>, the  
6 UFGVA rate used for comparison was \$0.013165 cents per m<sup>3</sup> not the \$0.019259 multiplied by  
7 the annual consumption. For the PGTVA, the rate used was \$0.006291 per m<sup>3</sup>, not the  
8 \$0.009203<sup>3</sup>.

9  
10 The proposed rate schedules are attached as Appendix A. The proposed rate schedules in  
11 Appendix A reflect the changes effective January 1, 2026 related to this QRAM application. The  
12 rate schedules also reflect the changes approved in the EB-2025-0177 Rate Order.

13  
14 ENGLP will include customer notices reflecting the changes in the gas supply commodity charge  
15 and distribution charges with their first bill on or after January 1, 2026. This customer notice  
16 has been included, for reference, in Appendix C.

17  
18 **J. SUMMARY**

19  
20 ENGLP proposes to change the reference price for amounts to be recorded in the Purchased Gas  
21 Commodity Variance Account from \$0.166755 by \$0.023595 to \$0.190350 per m<sup>3</sup> effective  
22 January 1, 2026. Appendix B contains the accounting entries related to the PGCVA.

23  
24 ENGLP proposes to change the reference price for amounts to be recorded in the Gas Purchase  
25 Rebalancing Account from \$0.001381 by -\$0.005373 to -\$0.003992 per m<sup>3</sup> effective January 1,  
26 2026.

27

---

<sup>1</sup> EB-2025-0177, Decision and Order, December 9, 2025  
<sup>2</sup> EB-2024-0130 ENGLP\_DVA Continuity Schedule\_DRO\_20250121, Tab UFGVA Continuity, Cells D53 and D61  
<sup>3</sup> EB-2024-0130 ENGLP\_DVA Continuity Schedule\_DRO\_20250121, Tab PGTVA Continuity, Cells D54 and D62

1 ENGLP also proposes to change the gas supply charge from \$0.168136 by \$0.018222 to  
2 \$0.186358 per m<sup>3</sup> effective January 1, 2026. This change reflects the change in the PGCVA  
3 reference price, as described above and the change related to the recovery of the GPRA balance.  
4 These changes apply to all system gas customers served under Rates 1, 2, 3, 4, 5 and 6.  
5

6 **K. RATE ORDER CORRECTION**  
7

8 ENGLP notes that the EB-2025-0177 rate order contained an error for RATE 6 – ALCO Energy  
9 Canada Aylmer Ethanol Production Facility. This has been corrected in the EB-2025-0318  
10 proposed rate order:  
11

12 The rate rider was calculated as a credit<sup>4</sup>, but was presented as a charge on the rate order:  
13

14 As per EB-2025-0177 decision (page 26 of 31):

15 Line b) Rate Rider for WACC Recovery \$441.36 per month  
16

17 Expected result:

18 Line b) Rate Rider for WACC Recovery (\$441.36) per month  
19  
20

**APPENDIX “A” TO  
DECISION AND RATE ORDER  
OEB File No: EB-2025-0318  
Dated: December XX, 2025**

**EPCOR Natural Gas Limited Partnership**

**RATE 1 - Residential Rate**

**Rate Availability**

The entire service area of the Company.

**Eligibility**

A customer that requires delivery of natural gas to any residential building served through one meter and containing no more than three dwelling units.

**Rate**

a)	Monthly Fixed Charge <sup>(1)</sup>	\$29.32
b)	Delivery Charge	
	All volumes per month	8.7763 cents per m <sup>3</sup>
	Rate Rider for REDA recovery – effective for 12 months ending December 31, 2026	\$0.06 per month
	Rate Rider for PGTVA recovery – effective for 12 months ending December 31, 2026	0.3241 cents per m <sup>3</sup>
	Rate Rider for UFGVA recovery – effective for 12 months ending December 31, 2026	0.4270 cents per m <sup>3</sup>
	Rate Rider for WACC recovery – effective for 12 months ending December 31, 2026	(0.1770) cents per m <sup>3</sup>
c)	Transportation Charge	2.9161 cents per m <sup>3</sup>
d)	Gas Supply Charge (if applicable)	Schedule A

<sup>(1)</sup> Aggregated within Monthly Fixed Charge is the amount of one dollar per month in accordance with Bill 32 and Ontario Regulation 24/19.

### **Meter Readings**

Gas consumption by each customer under this rate schedule shall be determined by monthly meter reading, provided that in circumstances beyond the control of the company such as strikes or non-access to a meter, the company may estimate the consumption each month as of the scheduled date of the regular monthly meter reading and render a monthly bill to the customer thereof.

### **Terms and Conditions of Service**

The provisions in the “EPCOR Natural Gas Limited Partnership Natural Gas Operations Conditions of Service” apply, as contemplated therein, to service under this Rate Schedule.

### **Bundled Direct Purchase Delivery**

Where a customer elects under this rate schedule to directly purchase its gas from a supplier other than EPCOR, the customer or their agent must enter into a Bundled T-Service Receipt Contract with EPCOR for delivery of gas to EPCOR. Bundled T-Service Receipt Contract rates are described in rate schedule BT1. The gas supply charge will not be applicable to customers who elect said Bundled T transportation service.

Unless otherwise authorized by EPCOR, customers who are delivering gas to EPCOR under direct purchase arrangements must obligate to deliver said gas at a point acceptable to EPCOR, and must acquire and maintain firm transportation on all pipeline systems upstream of Ontario.

Effective: January 1, 2026  
Implementation: All bills rendered on or after January 1, 2026  
EB-2025-0318

**EPCOR Natural Gas Limited Partnership**

**RATE 1 – General Service Rate**

**Rate Availability**

The entire service area of the Company.

**Eligibility**

A customer who has not entered into a contract with EPCOR with the company for the purchase or transportation of gas and does not meet the eligibility of the Rate 1 – Residential rate class.

**Rate**

## **EPCOR Natural Gas Limited Partnership**

### **RATE 3 - Special Large Volume Contract Rate**

#### **Rate Availability**

The entire service area of the company.

#### **Eligibility**

A customer who enters into a contract with the company for the purchase or transportation of gas:

- a) for a minimum term of one year;
- b) that specifies a combined daily contracted demand for firm and interruptible service of at least 700 m<sup>3</sup>; and
- c) a qualifying annual volume of at least 113,000 m<sup>3</sup>.

#### **Rate**

1. Bills will be rendered monthly and shall be the total of:

- a) A Monthly Customer Charge<sup>(1)</sup>:

A Monthly Customer Charge of \$240.79 for firm or interruptible customers; or  
A Monthly Customer Charge of \$267.20 for combined (firm and interruptible) customers.

- b) A Monthly Demand Charge:

A Monthly Demand Charge of 34.8861 cents per m<sup>3</sup> for each m<sup>3</sup> of daily contracted firm demand.

- c) A Monthly Delivery Charge:

- (i) A Monthly Firm Delivery Charge for all firm volumes of 1.7997 cents per m<sup>3</sup>,

- (ii) A Monthly Interruptible Delivery Charge for all interruptible volumes to be negotiated between the company and the customer not to exceed 10.0852 cents per m<sup>3</sup> and not to be less than 6.6129 per m<sup>3</sup>.

	Rate Rider for REDA recovery – effective for 12 months ending December 31, 2026	\$0.06 per month
	Rate Rider for PGTVA recovery – effective for 12 months ending December 31, 2026	0.3241 cents per m <sup>3</sup>
	Rate Rider for UFGVA recovery – effective for 12 months ending December 31, 2026	0.4270 cents per m <sup>3</sup>
	Rate Rider for WACC recovery – effective for 12 months ending December 31, 2026	(0.0602) cents per m <sup>3</sup>
d)	Transportation Charge	2.9161 cents per m <sup>3</sup>
e)	Gas Supply Charge (if applicable)	Schedule A
f)	Overrun Gas Charges:	

Overrun gas is available without penalty provided that it is authorized by the company in advance. The company will not unreasonably withhold authorization.

If, on any day, the customer should take, without the company’s approval in advance, a volume of gas in excess of the maximum quantity of gas which the company is obligated to deliver to the customer on such day, or if, on any day, the customer fails to comply with any curtailment notice reducing the customer’s take of gas, then,

- (i) the volume of gas taken in excess of the company’s maximum delivery obligation for such day, or
- (ii) the volume of gas taken in the period on such day covered by such curtailment notice (as determined by the company in accordance with its usual practice) in excess of the volume of gas authorized to be taken in such period by such curtailment notice,

as the case may be, shall constitute unauthorized overrun volume.

Any unauthorized firm overrun gas taken in any month shall be paid for at the Rate 3 Firm Delivery Charge in effect at the time the overrun occurs. In addition, the Contract Demand level shall be adjusted to the actual maximum daily volume taken and the Demand Charges stated above shall apply for the whole contract year, including retroactively, if necessary, thereby requiring recomputation of bills rendered previously in the contract year.

Any unauthorized interruptible overrun gas taken in any month shall be paid for at the Rate 1 Delivery Charge in effect at the time the overrun occurs plus any Gas Supply Charge applicable.

For any unauthorized overrun gas taken, the customer shall, in addition, indemnify the company in respect of any penalties or additional costs imposed on the company by the company's suppliers, any additional gas cost incurred or any sales margins lost as a consequence of the customer taking the unauthorized overrun volume.

2. In negotiating the Monthly Interruptible Commodity Charge referred to in 1(c)(ii) above, the matters to be considered include:
  - a) The volume of gas for which the customer is willing to contract;
  - b) The load factor of the customer's anticipated gas consumption, the pattern of annual use, and the minimum annual quantity of gas which the customer is willing to contract to take or in any event pay for;
  - c) Interruptible or curtailment provisions; and
  - d) Competition.
3. In each contract year, the customer shall take delivery from the company, or in any event pay for it if available and not accepted by the customer, a minimum volume of gas as specified in the contract between the parties. Overrun volumes will not contribute to the minimum volume. The rate applicable to the shortfall from this minimum shall be 3.6078 cents per m3 for firm gas and 6.2261 cents per m3 for interruptible gas.
4. The contract may provide that the Monthly Demand Charge specified in Rate Section 1 above shall not apply on all or part of the daily contracted firm demand used by the customer during the testing, commissioning, phasing in, decommissioning and phasing out of gas-using equipment for a period not to exceed one year (the transition period). In such event, the contract will provide for a Monthly Firm Delivery Commodity Charge to be applied on such volume during the transition of 6.3319 cents per m3 and a gas supply commodity charge as set out in Schedule A, if applicable. Gas purchased under this clause will not contribute to the minimum volume.

<sup>(1)</sup> Aggregated within Monthly Fixed Charge is the amount of one dollar per month in accordance with Bill 32 and Ontario Regulation 24/19.

### **Bundled Direct Purchase Delivery**

Where a customer elects under this rate schedule to directly purchase its gas from a supplier other than EPCOR, the customer or their agent must enter into a Bundled T-Service Receipt Contract with EPCOR for delivery of gas to EPCOR. Bundled T-Service Receipt Contract rates are described in rate schedule BT1. The gas supply charge will not be applicable to customers who elect said Bundled T transportation service.

Unless otherwise authorized by EPCOR, customers who are delivering gas to EPCOR under direct purchase arrangements must obligate to deliver said gas at a point acceptable to EPCOR, and must acquire and maintain firm transportation on all pipeline systems upstream of Ontario.

### **Terms and Conditions of Service**

The provisions in the “EPCOR Natural Gas Limited Partnership Natural Gas Operations Conditions of Service” apply, as contemplated therein, to service under this Rate Schedule.

Effective: January 1, 2026

Implementation: All bills rendered on or after January 1, 2026

EB-2025-0318

c) Transportation Charge	2.9161 cents per m <sup>3</sup>	2.9161 cents per m <sup>3</sup>
d) Gas Supply Charge		Schedule A

<sup>(1)</sup> Aggregated within Monthly Fixed Charge is the amount of one dollar per month in accordance with Bill 32 and Ontario Regulation 24/19.

### **Meter Readings**

Gas consumption by each customer under this rate schedule shall be determined by monthly meter reading provided that in circumstances beyond the control of the company such as strikes or non-access to a meter, the company may estimate the consumption each month as of the scheduled date of the regular monthly meter reading and render a monthly bill to the customer thereof.

### **Terms and Conditions of Service**

The provisions in the “EPCOR Natural Gas Limited Partnership Natural Gas Operations Conditions of Service” apply, as contemplated therein, to service under this Rate Schedule.

### **Bundled Direct Purchase Delivery**

Where a customer elects under this rate schedule to directly purchase its gas from a supplier other than EPCOR, the customer or their agent must enter into a Bundled T-Service Receipt Contract with EPCOR for delivery of gas to EPCOR. Bundled T-Service Receipt Contract rates are described in rate schedule BT1. The gas supply charge will not be applicable to customers who elect said Bundled T transportation service.

Unless otherwise authorized by EPCOR, customers who are delivering gas to EPCOR under direct purchase arrangements must obligate to deliver said gas at a point acceptable to EPCOR, and must acquire and maintain firm transportation on all pipeline systems upstream of Ontario.

Effective: January 1, 2026

Implementation: All bills rendered on or after January 1, 2026

EB-2025-0318

**EPCOR Natural Gas Limited Partnership**

**RATE 5 - Interruptible Peaking Contract Rate**

**Rate Availability**

The entire service area of the company.

**Eligibility**

A customer who enters into a contract with the company for the purchase or transportation of gas:

- a) for a minimum term of one year;
- b) that specifies a daily contracted demand for interruptible service of at least 700 m<sup>3</sup>; and
- c) a qualifying annual volume of at least 50,000 m<sup>3</sup>.

**Rate**

1. Bills will be rendered monthly and shall be the total of:

- a) Monthly Fixed Charge<sup>(1)</sup> \$202.35
- b) A Monthly Delivery Charge:

A Monthly Delivery Charge for all interruptible volumes to be negotiated between the company and the customer not to exceed 7.5930 cents per m<sup>3</sup> and not to be less than 4.1116 cents per m<sup>3</sup>.

Rate Rider for REDA recovery \$0.06 per month  
 – effective for 12 months ending December 31, 2026

Rate Rider for PGTVA recovery 0.3241 cents per m<sup>3</sup>  
 – effective for 12 months ending December 31, 2026

Rate Rider for UFGVA recovery 0.4270 cents per m<sup>3</sup>  
 – effective for 12 months ending December 31, 2026

Rate Rider for WACC recovery (0.0567) cents per m<sup>3</sup>  
 – effective for 12 months ending December 31, 2026

- c) Transportation Charge 2.9161 cents per m<sup>3</sup>

- d) Gas Supply Charge and System Gas Refund Rate Rider (if applicable) Schedule A
- e) Overrun Gas Charge:

Overrun gas is available without penalty provided that it is authorized by the company in advance. The company will not unreasonably withhold authorization.

If, on any day, the customer should take, without the company's approval in advance, a volume of gas in excess of the maximum quantity of gas which the company is obligated to deliver to the customer on such day, or if, on any day, the customer fails to comply with any curtailment notice reducing the customer's take of gas, then

- (i) the volume of gas taken in excess of the company's maximum delivery obligation for such day, or
- (ii) the volume of gas taken in the period on such day covered by such curtailment notice (as determined by the company in accordance with its usual practice) in excess of the volume of gas authorized to be taken in such period by such curtailment notice,

as the case may be, shall constitute unauthorized overrun volume.

Any unauthorized overrun gas taken in any month shall be paid for at the Rate 1 Delivery Charge in effect at the time the overrun occurs plus any applicable Gas Supply Charge.

For any unauthorized overrun gas taken, the customer shall, in addition, indemnify the company in respect of any penalties or additional costs imposed on the company by the company's suppliers, any additional gas cost incurred or any sales margins lost as a consequence of the customer taking the unauthorized overrun volume.

- 2. In negotiating the Monthly Interruptible Commodity Charge referred to in 1(b) above, the matters to be considered include:
  - a) The volume of gas for which the customer is willing to contract;
  - b) The load factor of the customer's anticipated gas consumption and the pattern of annual use and the minimum annual quantity of gas which the customer is willing to contract to take or in any event pay for;
  - c) Interruptible or curtailment provisions; and
  - d) Competition.
- 3. In each contract year, the customer shall take delivery from the company, or in any event pay for it if available and not accepted by the customer, a minimum volume of gas of 50,000 m<sup>3</sup>. Overrun volumes will not contribute to the minimum volume. The rate applicable to the shortfall from this annual minimum shall be 5.9761 cents per m<sup>3</sup> for interruptible gas.

<sup>(1)</sup> Aggregated within Monthly Fixed Charge is the amount of one dollar per month in accordance with Bill 32 and Ontario Regulation 24/19.

### **Bundled Direct Purchase Delivery**

Where a customer elects under this rate schedule to directly purchase its gas from a supplier other than EPCOR, the customer or their agent must enter into a Bundled T-Service Receipt Contract with EPCOR for delivery of gas to EPCOR. Bundled T-Service Receipt Contract rates are described in rate schedule BT1. The gas supply charge will not be applicable to customers who elect said Bundled T transportation service.

Unless otherwise authorized by EPCOR, customers who are delivering gas to EPCOR under direct purchase arrangements must obligate to deliver said gas at a point acceptable to EPCOR, and must acquire and maintain firm transportation on all pipeline systems upstream of Ontario.

### **Terms and Conditions of Service**

The provisions in the “EPCOR Natural Gas Limited Partnership Natural Gas Operations Conditions of Service” apply, as contemplated therein, to service under this Rate Schedule.

Effective: January 1, 2026

Implementation: All bills rendered on or after January 1, 2026

EB-2025-0318

## **EPCOR Natural Gas Limited Partnership**

### **RATE 6 – ALCO Energy Canada Aylmer Ethanol Production Facility**

#### **Rate Availability**

Rate 6 is available to the ALCO Energy Canada, (formerly IGPC) Aylmer ethanol production facility only.

#### **Eligibility**

ALCO Energy Canada (“ALCO Energy”) ethanol production facility located in the Town of Aylmer

#### **Rate**

1. Bills will be rendered monthly and shall be the total of:
  - a) Fixed Monthly Charge<sup>(1)</sup> for firm services \$73,410.71 per month
  - b) Rate Rider for WACC Recovery (\$441.36) per month

<sup>(1)</sup> Aggregated within Monthly Fixed Charge is the amount of one dollar per month in accordance with Bill 32 and Ontario Regulation 24/19.

#### **Purchased Gas Transportation Charges**

In addition to the Rates and Charges outlined above, ALCO Energy is responsible for all costs, charges and fees incurred by EPCOR related to gas supplied by Enbridge Gas Inc. to EPCOR’s system for ALCO Energy. All actual charges billed to ENGLP by Enbridge Gas Inc. under former Union Gas contract ID SA008936 and SA008937, as amended or replaced from time to time, shall be billed to ALCO Energy by EPCOR when and as billed to EPCOR by Enbridge Gas Inc.

#### **Bundled Direct Purchase Delivery**

Where ALCO Energy elects under this rate schedule to directly purchase its gas from a supplier other than EPCOR, ALCO Energy or its agent must enter into a Bundled T-Service Receipt Contract with EPCOR for delivery of gas to EPCOR. Bundled T-Service Receipt Contract rates are described in rate schedule BT1. The gas supply charge will not be applicable to ALCO Energy if it elects said Bundled T transportation service.

Unless otherwise authorized by EPCOR, ALCO Energy, when delivering gas to EPCOR under direct purchase arrangements, must obligate to deliver said gas at a point acceptable to EPCOR, and must acquire and maintain firm transportation on all pipeline systems upstream of Ontario.

## **Terms and Conditions of Service**

The provisions in the “EPCOR Natural Gas Limited Partnership Natural Gas Operations Conditions of Service” apply, as contemplated therein, to service under this Rate Schedule.

Effective: January 1, 2026

Implementation: All bills rendered on or after January 1, 2026

EB-2025-0318

**EPCOR Natural Gas Limited Partnership**

**SCHEDULE A – Gas Supply Charges**

**Rate Availability**

The entire service area of the company.

**Eligibility**

All customers served under Rates 1, 2, 3, 4, 5 and 6.

**Rate**

The Gas Supply Charge applicable to all sales customers shall be made up of the following charges:

PGCVA Reference Price	(EB-2025-0318)	19.0350	cents per m <sup>3</sup>
GPRA Recovery Rate	(EB-2025-0318)	<u>(0.3992)</u>	cents per m <sup>3</sup>
Total Gas Supply Charge		<u>18.6358</u>	cents per m <sup>3</sup>

**Note:**

PGCVA means Purchased Gas Commodity Variance Account  
GPRA means Gas Purchase Rebalancing Account

Effective: January 1, 2026  
Implementation: All bills rendered on or after January 1, 2026  
EB-2025-0318

## **EPCOR Natural Gas Limited Partnership**

### **RATE BT1 – Bundled Direct Purchase Contract Rate**

#### **Rate Availability**

Rate BT1 is available to all customers or their agent who enter into a Receipt Contract for delivery of gas to EPCOR. The availability of this option is subject to EPCOR obtaining a satisfactory agreement or arrangement with Enbridge Gas Inc. and EPCOR's gas supplier for direct purchase volume and DCQ offsets.

#### **Eligibility**

All customers electing to purchase gas directly from a supplier other than EPCOR must enter into a Bundled T- Service Receipt Contract with EPCOR either directly or through their agent, for delivery of gas to EPCOR at a mutually acceptable delivery point.

#### **Rate**

For gas delivered to EPCOR at any point other than the Ontario Point of Delivery, EPCOR will charge a customer or their agent all approved tolls and charges incurred by EPCOR to transport the gas to the Ontario Point of Delivery.

#### **Note:**

Ontario Point of Delivery means Dawn or Parkway on the Enbridge Gas Inc. (Union South) System as agreed to by EPCOR and EPCOR's customer or their agent.

Effective: January 1, 2026

Implementation: All bills rendered on or after January 1, 2026

EB-2025-0318

## **EPCOR Natural Gas Limited Partnership**

### **Transmission Service**

#### **Availability**

Transmission Service charges shall be applied to all natural gas producers that sell gas into Enbridge Gas' Union South system via ENGLP's distribution system.

#### **Eligibility**

All natural gas producers, transporting gas through ENGLP's system for sale into Enbridge Gas' Union South system shall be charged the Transmission Service Rate and associated Administrative Charge. Rates and Charges will be applied only in those months that a natural gas producer delivers gas to a delivery point on ENGLP's system for sale into Enbridge Gas' Union South system.

#### **Rate**

Administrative Charge	\$250/month
Transmission Service Rate	\$0.95/mcf

Effective: January 1, 2026

Implementation: All bills rendered on or after January 1, 2026

EB-2025-0318

DECISION AND RATE ORDER  
OEB File No: EB-2025-0318  
Dated: December 19, 2025**

## **IMPORTANT INFORMATION ABOUT YOUR GAS BILL**

### **Gas Prices:**

On all bills rendered by EPCOR on or after January 1, 2026, the price we charge for the gas commodity and transportation portion of your bill will be **increasing** by \$0.018222 per cubic meter to \$0.186358 per cubic meter. The Ontario Energy Board has approved this change to reflect the prices that EPCOR expects that it will be paying to its gas suppliers through to the end of December 2026. On your gas bill this cost is on the line entitled “Gas Commodity”.

As a regulated utility, EPCOR is permitted to recover what it pays for the purchase of gas plus any costs reasonably associated with this purchase but with no mark-up or ‘profit’. The price the utility charges you is based on the forecasted gas and transportation costs to EPCOR, which are periodically reviewed by the OEB and reconciled with actual costs. The gas commodity portion gets adjusted regularly throughout the year as the price of the gas commodity changes.

### **How will the price change impact you?**

That will depend on the amount of gas you use. For a typical residential customer who consumes approximately 2,065 cubic meters of gas annually, these price changes will **increase** your annual heating costs by approximately \$38 per year.

For customers who have arranged to have their gas supplied by a gas marketer/broker, the price may or may not change depending on the terms of the contract the customer has with the gas marketer/broker.

---

### **Delivery Charges:**

The OEB has also approved changes to the delivery charges that EPCOR charges its customers commencing January 1, 2026. On all bills rendered by EPCOR on or after January 1, 2026, there will be rate changes for the “Fixed Monthly Charge” and “Delivery To You Charges”. In addition, some temporary rate adjustments will be added to your bill from January 1, 2026 to December 31, 2026 to recover and/or refund specific amounts related to the clearing of balances in certain deferral and variance accounts as approved by the OEB. Anticipated annual impact for residential customers using the 2,065 cubic meters is a **decrease** of approximately \$20 per year.

If you have any questions about the changes in rates or any other item that appears on your bill, please feel free to call our office at 519-773-5321.

We would like to thank you for choosing to make natural gas your energy of choice.
