Pollution Probe & CAFES Ottawa Hearing Estimate**

Dear Mr. Murray:

In accordance with OEB direction, the following is the time estimate for the upcoming oral hearing. Pollution Probe and CAFES Ottawa have been able to consolidate their questions in an efficient manner which will enable them to be scheduled collectively together as one block of time. The total time estimate is 70 minutes which is approximately 60 minutes related to OM&A and 10 minutes for Net Metering Charge. The time estimate related to the Net Metering Charge is based on a time estimate for clarifications following the questions from Environmental Defence on that topic. We continue to coordinate in advance of the oral hearing and plan to ensure that we are able to include both subject areas within the total time estimate. Please reach out should you require additional detail.

Respectfully submitted on behalf of Pollution Probe and CAFES Ottawa.
