**Re: Enbridge Gas (Enbridge Gas)  
Leave to Construct Exemption Application for the Cedar Springs  
Community Expansion Project  
Ontario Energy Board File Number: EB-2025-0313**

On November 19, 2025, Enbridge Gas filed a Leave to Construct Exemption Application for the Cedar Springs Community Expansion Project.

On December 15, 2025, the OEB issued a Notice of Hearing (Notice). The Notice set January 14, 2026 as the deadline for the filing of notification letters and intervention requests.

On January 14, 2026, Six Nations of the Grand River filed a letter with the OEB requesting an extension to the deadline for the filing of notification letters and intervention requests. In its letter, Six Nations of the Grand River noted that there had been a delay in the application becoming publicly available for review.

The OEB would like to thank Six Nations of the Grand River for its letter and apologizes for the administrative issue that caused a delay in the application becoming available sooner.

The OEB grants the extension request and has revised the deadline for the filing of notification letters and intervention requests to **February 2, 2026**.

Yours truly,

Ritchie Murray  
Acting Registrar
