Subject: Deadline extension for OEB application EB-2025-0306

Dear Registrar:

I am a citizen of Lanark Highlands and wish to participate in Enbridge Gas Inc.'s application to construct a pipeline to the communities of Lanark, Balderson and surrounding areas. The stated deadline for submissions is January 26, 2026.

The Notice of Application appeared in the local newspaper, dated January 13, 2026. The Notice includes a file number EB-02025-0306 to review the application, apply to intervene and file a letter of comments. Using this number, I—and several other people—could not access the appropriate webpages.

I first called Enbridge but the number listed in the Notice only works if you're a customer.

I then called OEB—and only then, with the help of an agent, was I able to access the files and the web pages where I could register and submit comments.

Given that the Notice only came out 13 days before the deadline and that the information provided in the Notice was inaccurate (did not take me to the webpages needed), I respectfully request that the deadline for submissions be extended.

Sincerely,,

Gordon
