NOTICE OF A PAYMENT AMOUNTS HEARING

Ontario Power Generation Inc. and DNNP LP have applied to set payment amounts for the output from regulated hydroelectric and nuclear generating stations effective January 1, 2027

Ontario Power Generation Inc. (OPG) has applied to the Ontario Energy Board to set the amount charged for the output of its regulated hydroelectric generating facilities and, with its co-applicant DNNP LP, to set the amount charged for the output of its regulated nuclear generating facilities, including the Darlington New Nuclear Program facilities. The application covers the five-year period beginning January 1, 2027, through December 31, 2031.

In its application, OPG has calculated that the monthly bill for a typical residential customer using 750 kWh of electricity per month would increase by the following amounts, if approved:

2027	2028	2029	2030	2031
\$7.94	\$2.45	\$1.37	\$0.74	\$4.67

Other customers, including businesses, would be affected as well.

The payment amounts include the costs of refurbishing Units 5-8 at the Pickering Nuclear Generating Station and constructing the Darlington New Nuclear Program facilities during the five-year period.

The application also includes requests for the following approvals, amongst others:

- Of custom frameworks to set the hydroelectric and nuclear payment amounts
- To change OPG's capital structure and establish DNNP LP's capital structure
- To dispose of the December 31, 2024, balances of certain deferral and variance accounts
- To establish new deferral and variance accounts, including new accounts for the Darlington New Nuclear Program facilities
- Of an annual process to recover interest amounts associated with capital costs for refurbishing Pickering B and constructing the Darlington New Nuclear Program facilities

AVIS D'AUDIENCE SUR LES MONTANTS FACTURÉS

**Ontario Power Generation Inc. et DNNP LP ont déposé
une demande en vue de fixer les montants facturés pour la production
des centrales hydroélectriques et nucléaires réglementées à compter du
1^{er} janvier 2027**

Ontario Power Generation Inc. (OPG) a demandé à la Commission de l'énergie de l'Ontario de fixer le montant facturé pour la production de ses centrales hydroélectriques réglementées et, avec son codemandeur, DNNP LP, de fixer le montant facturé pour la production de ses centrales nucléaires réglementées, y compris la nouvelle centrale nucléaire de Darlington. La demande couvre la période de cinq ans allant du 1er janvier 2027 au 31 décembre 2031.

Dans sa demande, OPG a calculé que la facture mensuelle d'un client résidentiel type consommant 750 kWh d'électricité par mois augmenterait des montants suivants, si la demande était approuvée :

2027	2028	2029	2030	2031
7,94 \$	2,45 \$	1,37 \$	0,74 \$	4,67 \$

Les autres clients, y compris les entreprises, seraient également concernés.

Les montants facturés comprennent les coûts de réfection des unités 5 à 8 de la centrale nucléaire de Pickering et les coûts de construction de la nouvelle centrale nucléaire de Darlington pendant la période de cinq ans.

La demande comprend également les demandes d'approbation suivantes, entre autres :

- Des cadres personnalisés pour fixer les montants facturés pour les centrales hydroélectriques et nucléaires
- La modification de la structure du capital d'OPG et l'établissement de la structure du capital de DNNP LP
- La disposition des soldes de certains comptes de report et d'écart au 31 décembre 2024
- L'établissement de nouveaux comptes de report et d'écart, y compris de nouveaux comptes pour la nouvelle centrale nucléaire de Darlington
- Un processus annuel de recouvrement des montants d'intérêts associés aux coûts en capital pour la réfection de Pickering B et la construction de la nouvelle centrale nucléaire de Darlington
