

NOTICE OF A RATE HEARING

Ellexicon Energy Inc. has applied to change its electricity distribution rates and other charges effective January 1, 2027

If the application is approved as filed, a typical residential customer and a typical general service customer of Ellexicon Energy Inc. (Ellexicon Energy) would see the following monthly increases effective January 1, 2027:

Customer Class	Veridian Rate Zone	Whitby Rate Zone
Residential (750 kWh)	\$5.95	\$3.61
General Service less than 50kW (2,000 kWh)	\$9.06	\$0.04

Other customers, including businesses, will also be affected. The bill impacts noted above exclude changes to rates resulting from the Ontario Energy Board's (OEB) recent decision on Ellexicon Energy's 2026 Incentive Rate-setting Mechanism application (EB-2025-0046).

This is the first rebasing application since the amalgamation of Veridian Connections and Whitby Hydro in 2019.

Ellexicon Energy has also applied for the approval:

- Of a custom scorecard and custom rate framework to set distribution rates effective for the period from January 1, 2028 to December 31, 2031. The proposed rate framework is based on a formula that is tied to inflation, supports investment needs, and other factors intended to promote efficiency.
- To harmonize its electricity distribution rates and other charges, retail transmission rates, low voltage rates, loss factors, and specific service charges for the Whitby and Veridian rate zones into a consolidated rate zone.
- To establish new rate riders to dispose of balances in regulatory deferral and variance accounts.
- To establish new deferral and variance accounts.

It's important to review the application carefully to determine whether you may be affected by the proposed changes.
