

## **LETTER OF COMMENT**

### **Comments:**

Our farm business fully supports Enbridge's proposed expansion of the natural gas pipeline from Perth, through Balderson, to Lanark. We are a growing farm operation that includes a commercial grain elevator. Having access to natural gas through the fall harvest season to properly dry and condition the crops that we receive will have a direct benefit to over 50 farm families in the Lanark/Balderson area and ensure that their drying costs remain low and farms remain viable and competitive.
