Hi Alanna,

Good morning! No worries at all, I totally understand.

Thank you for the response and confirmation. This will be sufficient. I will publish this email chain along with the last confirmed model on RDS today and we will proceed further.

Regards,  
Adhish

Good afternoon Adhish,

Please accept our sincere apologies for the delayed response. I am glad you sent a follow-up email, as your initial message was not released to us by IT.

I confirm that the minutes of the January 15 meeting accurately reflect the discussion and decisions from the meeting.

With respect to the following question:

*"4. The OEB issued its Decision and Order EB-2025-0232 for final UTRs and the Rate Order EB-2025-0030 for final Hydro One Sub-Tx rates. OEB Staff has updated Tab 11 of the attached Rate Generator Model to reflect the 2026 values. The values that were previously used consisted of the preliminary UTRs and proposed Hydro One Sub-Tx rates. Please confirm the updated values and, if applicable, update the Rate Generator Model."*

We confirm that Tab 11 of the Rate Generator Model reflects the OEB-approved final values. I have reviewed each tab in the model to ensure the updated values flow through and that the bill impacts are reflective of these changes.

Please let me know if this response is sufficient or if you would prefer a formal response letter to be uploaded through RESS.

Kind regards,

**Alanna Ross**

Hi Alanna and Becky,

Good afternoon and thank you for your patience.

Please find below the minutes of the January 15<sup>th</sup> meeting and confirm the same, also please provide responses where applicable.

1. Bluewater's responses to Staff Question 3 and 4, along with the corresponding Rate Generator Model were discussed.
2. Regarding Bluewater's response to Staff Question 3 – OEB staff highlighted that in Tab 3 Continuity Schedule of the Rate Generator Model, the balance of each Group 1 account approved for disposition should be transferred to the applicable principal and carrying charge sub-accounts for Account 1595. Further, OEB Staff requested a verification of the amounts included under "Transactions Debit/Credit" column.

**OEB Staff notes that the above requested updates have been completed in the updated model submitted on January 15, 2026.**

3. For the response to Staff Question 4, OEB Staff sought clarification if Bluewater is seeking Disposition and Recovery/Refund of Regulatory Balances (2021) for Account 1595 as the IRM Application EB-2025-0052 does not mention this, while the submitted Rate Generator Model indicates "Yes". Bluewater clarified that they intended to seek the disposition of the aforementioned account, however, since the total claim does not meet the threshold test, Bluewater is not seeking the disposition of any of the Group 1 accounts.

OEB Staff requested Bluewater to include such detailed clarification in the Manager's

Summary in the future applications.

4. The OEB issued its [Decision and Order](#) EB-2025-0232 for final UTRs and the [Rate Order](#) EB-2025-0030 for final Hydro One Sub-Tx rates. OEB Staff has updated Tab 11 of the attached Rate Generator Model to reflect the 2026 values. The values that were previously used consisted of the preliminary UTRs and proposed Hydro One Sub-Tx rates.

**Please confirm the updated values and if applicable, update the rate generator model.**

Regards,

Hi Alanna and Jody,

It was nice meeting the Bluewater team today.

Thanks for sending the updated model.  
We will take a look and get back to you sometime early next week.

I will also include the minutes of today's meeting at that time.

Regards,  
Adhish

Hi Alanna and Jody,

Happy New Year!

I went through your responses to the staff questions.

Would you be available for a call tomorrow at either 9.30 am or 11 am to discuss a couple of items?

Our Regulatory Accounting SME – Pauline, would also be joining the call to support the discussion.

Please let me know if that works for you.

Regards,

**Adhish Tendulkar**
