EB-2025-0252	Electricity – Rates	Granted
EB-2025-0268	OEB Consultations - Electricity	Granted
EB-2025-0297	Electricity – Rates	Granted

Issues:

Supporters of Energy Probe are residential customers of the Elexicon. The rates they pay will be impacted by the outcome of this proceeding. Energy Probe will focus on the proposed custom rate framework, the distribution system plan, grid modernization, electrification including DER connections and EV charging and the resulting load forecast from these initiatives.

Policy Interests:

Energy Probe believes in the principles of user pay and costs follow benefits. The costs of investments to enable DER connections and EV charging stations should be charged to customers who own DERs and EVs, not to all customers of Elexicon. Energy Probe represents the interests of the vast majority of customers who do not own DER or EVs. Another policy concern of Energy Probe is that custom incentive regulation plans proposed by distributors including Elexicon do not have sufficient incentives for productivity improvements and transfer too much risk from shareholders to ratepayers.

Hearings:

Energy Probe does not believe that there is a good reason for having a specific form of hearing.

Evidence:

Energy Probe does not intend to file evidence in the proceeding.

Coordination with Other Intervenors:

Energy Probe intends to coordinate its efforts with intervenors with similar interests by sharing plans for interrogatories, technical conference, and the hearing to avoid duplication.

Cost Awards:

Energy Probe applies for recovery of its reasonably incurred costs during its intervention in this proceeding. Energy Probe is a non-profit organization which relies on individual donations to help protect the public interest. Without the prospect of an award of costs, Energy Probe's ability to participate in OEB proceedings would be limited. Energy Probe's members and supporters are customers of the Applicant and are eligible for an award of costs according to section 3.03(a) of the Practice Directions. Energy Probe has participated in many past natural gas and electricity proceedings in Ontario, including consultations, rate cases, and other processes and hearings, and has been found eligible to be paid its reasonably incurred costs.

Language Preference:

Energy Probe does not intend to participate using the French language.
