Hello Mariana,

Thank you for your follow-up questions.

With respect to Low Voltage (LV) service rates, Hydro 2000 confirms that it is not applying to update its LV service rates as part of the 2026 IRM application.

An update was initially considered, however, upon review, Hydro 2000 confirmed that its LV service rates were already updated and approved as part of its 2025 Cost of Service application, based on recent LV costs. As a result, H2000 is not apply for revised LV rates in the 2026 IRM. The Rate Generator Model correctly reflects “No” on Tab 1, Information Sheet, page 5 should have stated "no" and no revisions to Tabs 16.1 or 16.2 are required.

With respect to RTSR, Hydro 2000 confirms that the updates made to Tab 11 of the 2026 IRM Rate Generator Model to reflect the OEB’s final UTRs and final Hydro One Sub-Tx rates effective January 1, 2026, are correct. Thank you for making these changes

Please let us know if you have further questions and if you need us to put this response on the record.

Thanks  
Manuela( on behalf of Lise Wilkinson, Hydro 2000 Inc.)

**Subject:** 2 Follow up Questions: H2000 EB-2025-0032 - 2026 IRM

Good day, Lise, and Manuela

I have two follow up questions related to the above proceeding:

**Follow up question – 1**

**Reference 1:** 2026 IRM Manager Summary, “H2000 also applies for: Approval of updated Low Voltage (LV) service charges, page 5

**Reference 2:** 2026 IRM Manager Summary, Table 1 – Executive Summary Table, Low Voltage Service Rates – Request for OEB Approval - “Yes”, page 6

**Reference 3:** 2026 IRM Manager Summary, “Hydro 2000 is not seeking approval to update its Low Voltage (LV) service rates in this 2026 IRM application. The current LV charges

were already updated and approved as part of H2000's

2025 Cost of Service (COS) application, using the most recent year of actual LV costs (2024).”, page 11

**Reference 4:** 2026 IRM Rate Generator Model Excel, Tab 1 - Information Sheet, line 58 – option 9 “Do you want to update your low voltage service rate?” has been denoted as “No”

**Preamble:**

In both references 1 & 2, H2000 is requesting approval to change its Low Voltage (LV) Service Rate.

In both references 3 & 4, H2000 is not requesting approval to change its Low Voltage (LV) Service Rate.

**Question(s):**

1. Please confirm/clarify whether H2000 is applying to update its Low Voltage (LV) Services Rates as part of its 2026IRM application.
2. If H2000 is requesting approval to update its Low Voltage Service Rate, please update the Rate Generator Model accordingly:
  - a. Tab 1 – Information Sheet, line 58 – option 9
  - b. Tabs 16.1 and 16.2 for Low Voltage calculations – there will be data that will need to be added to the model.

**Follow up question – 2**

**Reference:** 2026 IRM Rate Generator Model Excel, Tab 11 – RTSR – UTRs & Sub-Tx, UTRs and Hydro One Sub-Tx Rates effective 2026.

**Preamble:**

The OEB issued its [Decision and Order](#) for final UTRs and the [Rate Order](#) for final Hydro One Sub-Tx rates. I updated the attached 2026 IRM Rate Generator Model.

**Question:**

1. Kindly review and confirm that the updates are correct.

*Please let me know if you have any questions.*

Respectfully,

**Mariana Svistun | Analyst, Electricity Distribution II | Ontario Energy Board**
