

**OPA RESPONSE TO BOARD STAFF INTERROGATORY 1.0 (D) v.**

QUESTION

(D) v. What are OPA's current plans regarding the use of Lennox as a system resource when it is no longer required as a RMR resource.

RESPONSE

Plans for the use of Lennox as a system resource when it is no longer required as a RMR resource are currently being re-assessed in response to the Supplementary Directive issued on September 17, 2008. The need for Lennox to continue operation as a peaking resource into the period beyond 2010 will continue in order to meet overall system adequacy and operability requirements.
