Toronto, ON M4P 1E4

Dear Mr. Murray,

EB-2026-0003 – Hydro One Networks Inc. Leave to Construct Application – M31W Reinforcement Project – Affidavit of Service

Please find attached Hydro One Networks Inc.'s Affidavit of Service regarding the fulfillment of the Letter of Direction, received from the Ontario Energy Board on February 23, 2026.

Sincerely,

A handwritten signature in black ink, appearing to read "Eryn MacKinnon".

Eryn MacKinnon
Attach.

CANADA	}	IN THE MATTER OF the Ontario Energy Board Act,
	}	1998, S.O. 1998, c.15, Sched. B (the “Act”).
PROVINCE OF ONTARIO	}	AND IN THE MATTER OF an Application by Hydro
	}	One Networks Inc. (“Hydro One”) pursuant to
	}	section 92 of the Act for an Order or Orders granting
	}	leave to construct transmission line facilities
	}	(“M31W Reinforcement Project” or “Project”) in
	}	southwestern Ontario in the City of London.
	}	AND IN THE MATTER OF an Application by Hydro
	}	One pursuant to section 97 of the Act for an Order
	}	granting approval of the forms of land use

	}	landowners.

AFFIDAVIT OF ERYN MACKINNON

I, Eryn MacKinnon, of the City of Toronto, in the Province of Ontario, MAKE OATH AND SAY AS FOLLOWS:

1. I am employed as a Regulatory Advisor in the Regulatory Affairs Division of the Applicant, Hydro One Networks Inc.
2. Hydro One has complied with the Ontario Energy Board’s (“OEB”) Letter of Direction dated February 23, 2026, in respect of EB-2026-0003 (the “Letter”) as set out below.
3. In accordance with paragraph 1 of the Letter, Hydro One conducted a title search sufficient to determine the registered property owners and encumbrancers with lands or interests directly affected by the proposed application and related facilities refurbishments. I have been advised and do truly believe that this search has been completed as required.
4. In accordance with paragraph 2, subsection (a) of the Letter, Hydro One served the encumbrancers identified as having lands or interests directly affected by the proposed facilities refurbishments. The Notice package was delivered by courier and included a copy of the OEB’s English and French Notice, as well as the Application. A copy of the Notice package as sent to the described parties is attached at **Exhibit “A”**. A copy of the courier manifest is attached at **Exhibit “B”**.

5. In accordance with paragraph 2, subsections (b) through (f) of the Letter, an electronic copy of the Notice and the Application (Exhibit “A”) was served on the following:

- Hydro One transmission customers, generators, and electricity distributors impacted by the proposed refurbishment of the transmission line;
- Owners and operators of rail lines, telecommunications networks, and other utilities along or crossing the proposed route and location for the M31W Reinforcement Project;
- The clerks for the City of London;
- Specified provincial ministries, agencies, and federal departments.

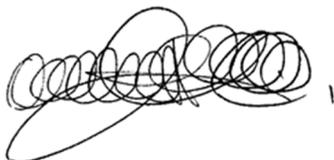

Copies of the email correspondence are attached at **Exhibit “C”**.

6. In accordance with paragraph 3 of the Letter, the English and French versions of the Notice, the Application, and the Evidence were posted on Hydro One’s website on March 1, 2026. A copy of the website posting is attached at **Exhibit “D”**.

The Notice of Hearing and the Application and Evidence can be accessed at the following website:

Notice Package

This is Exhibit "A" to the Affidavit of
Eryn MacKinnon. Sworn before me this 5
day of March, 2026

Commissioner for Taking Affidavits

Hydro One Networks Inc. has applied for leave to reconstruct a section of existing transmission line in the City of London

Hydro One Networks Inc. (Hydro One) has applied to the Ontario Energy Board (OEB) for an order granting leave to reconstruct a section of an existing 230 kV single-circuit transmission line between Buchanan Transformer Station and Old Victoria Road Junction within the City of London (M31W Project). The length of the transmission line facilities is approximately 4 kilometres and the forecast total capital cost is approximately \$15.4 million.

You can view the application by visiting www.oeb.ca/notice and using file number **EB-2026-0003**. A map of the proposed route for the M31W Project is provided below.

Hydro One says the proposed M31W Project is needed to maintain supply to the London Area, as outlined in the Independent Electricity System Operator (IESO) bulk planning report for Central-West Ontario.

Hydro One says that the existing transmission corridor would provide sufficient width for the proposed M31W Project and that no new permanent land rights would be required. Hydro One would also require temporary off-corridor access to facilitate construction of the M31W Project. Hydro One is asking the OEB to approve the forms of agreement it would offer to landowners for the temporary use of their land.

Hydro One says the expected rate impact associated with the M31W Project is a \$0.09 / kW / month decrease in the network pool rate and a 0.09% decrease on the overall average Ontario residential customer's electricity bill.

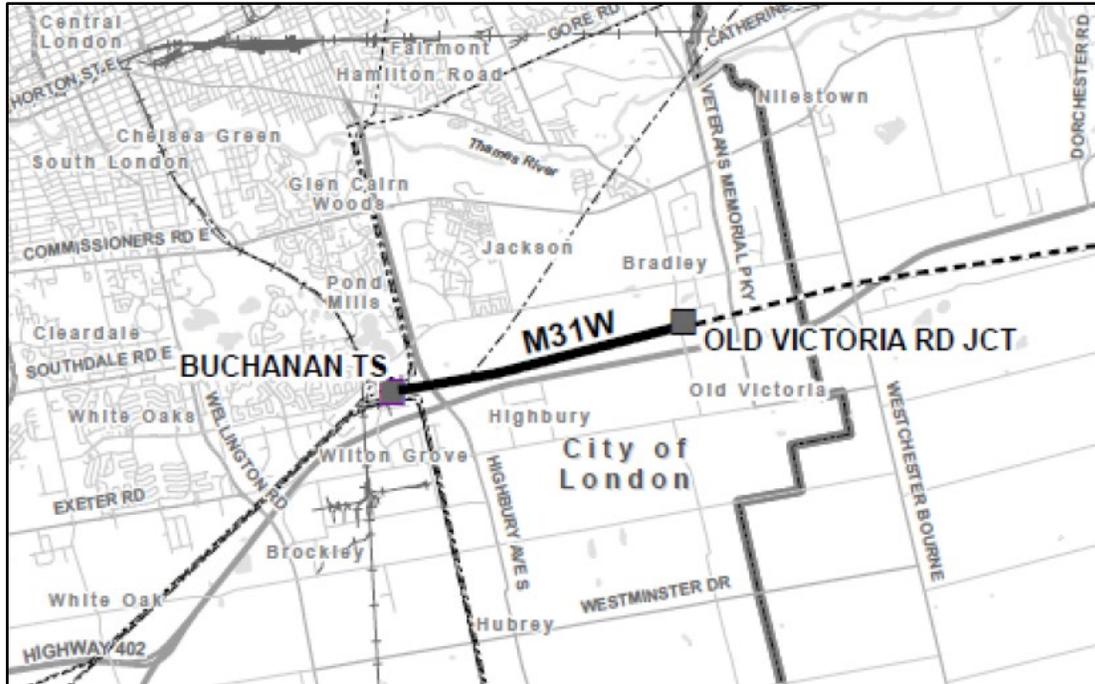

The IESO's Final System Impact Assessment concludes that the M31W Project is expected to have no material adverse impact on the reliability of the integrated power system.

Hydro One has completed a Final Customer Impact Assessment and has confirmed that the proposed project can be incorporated without adverse impact on Hydro One Transmission customers.

REQUEST FOR NO HEARING

Hydro One says that the M31W Project will not adversely affect customers in any material way and has requested that the application be decided without a hearing. If you believe a hearing is needed, you can request one by filing a letter with the OEB no later than **March 10, 2026**. You should indicate whether you have a preference for the hearing to be oral, electronic or written. If you do not file a letter by the due date, you may not receive any further notice in the event the OEB proceeds with a hearing. If you submit a letter, your name and the content of your letter will be put on the public record and the OEB website.

M31W Project Route Map

Energy
Board

Hydro One Networks Inc. a déposé une requête en vue de demander l'autorisation de reconstruire une section de la ligne de transport existante dans la

Hydro One Networks inc. (Hydro One) a déposé une requête auprès de la Commission de l'énergie de l'Ontario (CEO) en vue d'obtenir une ordonnance autorisant la reconstruction d'une section d'une ligne de transport à circuit unique de 230 kV entre le poste de transformation de Buchanan et la jonction du chemin Old Victoria dans la ville de London (projet M31W). La longueur des installations de la ligne de transport est d'environ 4 kilomètres et le coût total prévu des immobilisations est d'environ 15,4 millions de dollars.

Il est possible de consulter la requête sur le site www.oeb.ca/notice à l'aide du numéro de dossier **EB-2026-0003**. Une carte du tracé proposé pour le projet M31W est fournie ci-dessous.

Hydro One affirme que le projet M31W proposé est nécessaire afin de maintenir l'approvisionnement dans la région de London, comme l'indique le rapport de planification général de la Société indépendante d'exploitation du réseau d'électricité (SIERE) pour le Centre-Ouest de l'Ontario.

Hydro One affirme que le corridor de transport existant offrirait une largeur suffisante pour le projet M31W proposé et qu'aucun nouveau droit foncier permanent ne serait requis. Hydro One aurait également besoin d'un accès temporaire à l'extérieur du corridor pour faciliter la construction du projet M31W. Hydro One demande à la CEO d'approuver les modèles d'entente qu'elle offrirait aux propriétaires fonciers pour l'utilisation temporaire de leurs terres.

Hydro One affirme que l'incidence prévue sur les tarifs associés au projet M31W est une diminution de 0,09 \$/kW/mois du tarif du réseau commun et une diminution de 0,09 % de la facture d'électricité moyenne globale des clients résidentiels de l'Ontario.

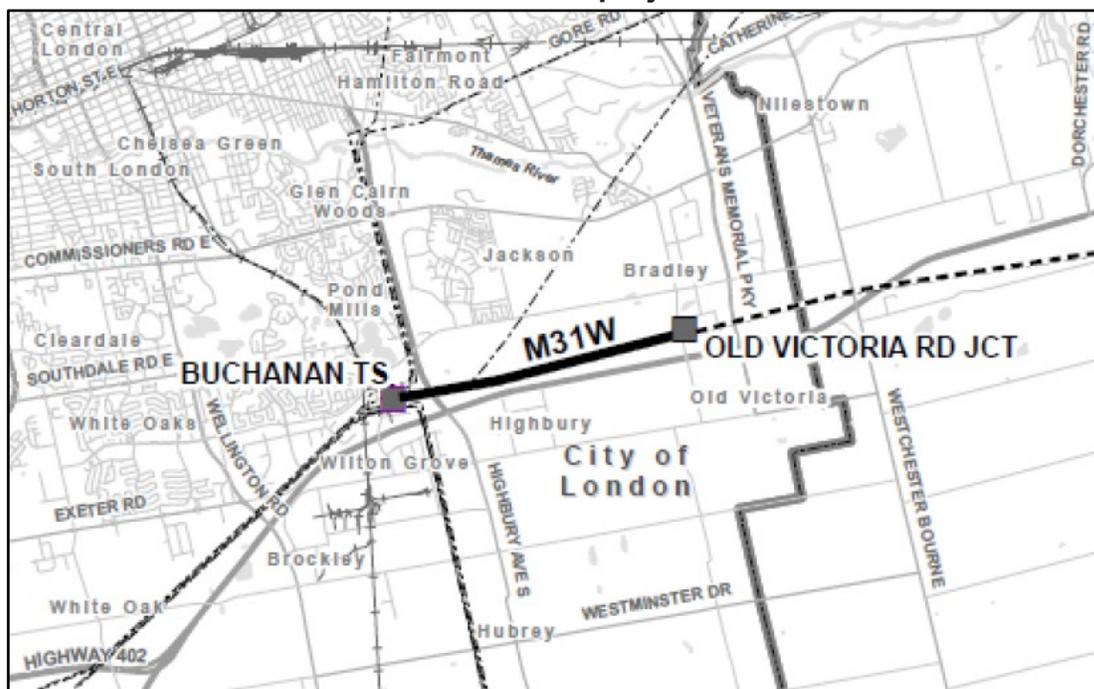

L'évaluation finale des répercussions sur le réseau réalisée par la SIERE conclut que le projet M31W ne devrait avoir aucune incidence négative importante sur la fiabilité du réseau électrique intégré.

Hydro One a effectué une évaluation finale des répercussions sur les clients et a confirmé que le projet proposé peut être intégré sans incidence négative sur les clients d'Hydro One.

DEMANDE D'ABSENCE D'AUDIENCE

Hydro One affirme que le projet M31W n'aura aucune incidence négative importante sur ses clients et a demandé que la demande soit traitée sans audience. Si vous croyez qu'une audience est nécessaire, vous pouvez en demander une en déposant une lettre à la CEO au plus tard le **10 mars 2026**. Vous devez indiquer si vous préférez que l'audience se déroule de vive voix, par voie électronique ou à l'écrit. Si vous ne déposez pas de lettre avant l'échéance, il est possible que vous ne receviez aucun autre avis si la CEO procède à une audience. Si vous soumettez une lettre, votre nom et le contenu de celle-ci seront ajoutés au dossier public et au site Web de la CEO.

- 1 need in their supplemental evidence provided for the purposes of this Application in
2 **Attachment 1 of Exhibit B, Tab 3, Schedule 1**. The Project has been identified as
3 a non-discretionary development project in **Exhibit B, Tab 4, Schedule 1**.
4
- 5 4. The 230 kV conductor selected by Hydro One to complete the Project has been
6 predicated on Hydro One's commitment to minimize transmission line losses where
7 feasible. Further information regarding the transmission line loss analysis for this
8 Project is provided in **Exhibit B, Tab 5, Schedule 1**.
9
- 10 5. An overview map of this area is provided in **Exhibit B, Tab 2, Schedule 1,**
11 **Attachment 1**, and a schematic diagram of the proposed Project can be found at
12 **Exhibit B, Tab 2, Schedule 1, Attachment 2**.
13
- 14 6. The existing transmission corridor will provide sufficient width for the proposed
15 Project. The existing transmission corridor is exclusively situated on Bill 58 lands over
16 which Hydro One holds a statutory easement, except for, where necessary, crossing
17 perpendicularly over public roads. As a result, no new permanent land rights on
18 properties between Buchanan TS and Old Victoria Road Junction will be required to
19 accommodate the proposed transmission facilities. Further information regarding
20 Hydro One's real estate needs to complete this Project are provided in **Exhibit E, Tab**
21 **1, Schedule 1**.
22
- 23 7. In accordance with the Class EA for Transmission Facilities¹, the reconstruction of
24 the existing 230 kV transmission line as outlined in this Application is exempt from
25 the requirements of the *Environmental Assessment Act*, contingent upon the
26 completion of the Archaeological Screening Process. A Notice of Project Screening
27 will be provided to the MECP in early 2026 to document that Hydro One has followed
28 the Archaeological Screening Process.

¹ Class Environmental Assessment for Transmission Facilities (February 2024), Section 1.3.2

- 1 8. The proposed in-service date for the Project is February 2027, assuming a
2 construction commencement date of July 2026 and OEB approval of this Application
3 by June 2026. A project schedule consistent with the aforementioned assumptions
4 is provided at **Exhibit B, Tab 11, Schedule 1**.
- 5
- 6 9. The IESO has completed a Final SIA. The Final SIA concludes that the Project is
7 expected to have no material adverse impact on the reliability of the integrated power
8 system and recommends that a *Notification of Conditional Approval for Connection*
9 be issued. The IESO's Final SIA is provided as **Exhibit F, Tab 1, Schedule 1,**
10 **Attachment 1**.
- 11
- 12 10. Hydro One has completed a Final CIA in accordance with Hydro One's connection
13 procedures. A copy of the Final CIA is provided as **Exhibit G, Tab 1, Schedule 1,**
14 **Attachment 1**. Hydro One will fulfill all requirements of the SIA and the CIA, and will
15 obtain all necessary approvals, permits, licences, certificates, agreements, and rights
16 required to construct the Project.
- 17
- 18 11. The total capital cost forecast for the Project transmission facilities is \$15.4 million².
19 Details pertaining to the cost are provided at **Exhibit B, Tab 7, Schedule 1**.
- 20
- 21 12. The Project will increase the supply transfer capability by 300MW and maintain the
22 reliability and integrity of the transmission system. The expected rate impact
23 associated with the Project (using 2025 OEB-approved uniform transmission rates as
24 filed in **Exhibit B, Tab 9, Schedule 1**) is a \$0.09/kW/month decrease in the network
25 pool rate and a 0.09% decrease on the overall average Ontario residential customer's
26 electricity bill.
- 27
- 28 13. Hydro One will require temporary off-corridor access to facilitate entry for the
29 construction of the transmission facilities. As such, this Application is also seeking

² There will be an additional \$0.8M of OMA removal costs associated with constructing this Project.

1 approval of the forms of the agreement offered or to be offered to affected
2 landowners, pursuant to section 97 of the Act. These agreements are in the same
3 form as previously approved in prior Hydro One leave to construct proceedings. The
4 forms of the applied-for agreements are found as attachments to **Exhibit E, Tab 1,**
5 **Schedule 1.**
6

7 14. The Application is supported by written evidence which includes details of the
8 Applicant's proposal for the transmission line. The written evidence is prefiled and
9 may be amended from time to time prior to the Board's final decision on this
10 Application.
11

12 15. Based on the foregoing, and the information provided in the prefiled evidence, Hydro
13 One submits that the Project is in the public interest. The Project meets the need to
14 maintain the capability of the bulk system and reduces the price paid by ratepayers.
15

16 16. Hydro One consents to the conditions outlined in the OEB's standard conditions of
17 approval for electricity transmission leave to construct applications³ for this Project.
18

19 17. Hydro One further consents that this proceeding be disposed of without a hearing
20 pursuant to section 21(4) of the OEB Act. As is documented in the CIA there are no
21 directly connected customers that are adversely affected by this Project. The IESO's
22 SIA confirms that the Project will have no material adverse impact on the reliability of
23 the integrated power system. The Project reduces transmission line losses in a cost-
24 effective manner and requires no new permanent land rights to complete. The Project
25 will ensure continued, reliable bulk supply to the area, and is forecast to reduce the
26 network pool rate and the overall average Ontario consumer's electricity bill. Given
27 all of the above, Hydro One concludes that this Project will not adversely affect
28 customers in any material way.

Notice of an Application

On February 23, 2026, the Ontario Energy Board (OEB) issued its Notice of Application regarding Hydro One Networks Inc.'s (Hydro One) application for an order granting leave to reconstruct a section of the existing 230 kV single-circuit transmission line between Buchanan Transformer Station and Old Victoria Road Junction within the City of London (the M31W Reinforcement Project).

You are receiving this Notice pursuant to the OEB's Letter of Direction, which requires Hydro One to serve the Notice on ministries, agencies, federal departments, municipalities, utilities, transmission customers, generators, and other parties with an interest in the proposed refurbishment of the transmission line.

Hydro One has requested that the OEB dispose of this application without a hearing under section 21(4)(b) of the Ontario Energy Board Act, 1998. Before making its determination, the OEB is canvassing for comments on the need for a hearing. If you wish to submit comments, the OEB must receive them by **March 10, 2026**.

The Notice, application, and evidence are available on Hydro One's website at:
<https://www.hydroone.com/abouthydroone/RegulatoryInformation/oebapplications>

Use the links below to view and/or download files:

Ontario Energy Board Applications

[Home](#) > [abouthydroone](#) > [RegulatoryInformation](#) > [oebapplications](#)

We research, prepare, and submit applications to the Ontario Energy Board (OEB) related to rates, projects, acquisitions and operations. The OEB in turn reviews and questions the applications on behalf of the public interest.

COPIES OF ALL APPLICATIONS BELOW CAN BE VIEWED AT:

Hydro One Networks Inc. | Regulatory Affairs
