Ritchie Murray
Registrar
Ontario Energy Board
2300 Yonge Street, 27th Floor
Toronto, Ontario
M4P 1E4

Dear Mr. Murray:

EB-2025-0295 Enbridge Gas Inc. (“Enbridge”) 2027-2030 Demand Side Management (DSM) Plan Application - Building Owners and Managers Association Toronto (BOMA Toronto) Comments on Draft Issues List

Pursuant to Procedural Order 1 and the Ontario Energy Board’s (OEB) March 5, 2026 letter, BOMA Toronto provides the following comments on the draft issues list and whether the consideration of a cost of carbon for DSM cost-effectiveness testing should be within the scope of this proceeding.

Cost of Carbon

BOMA Toronto submits that the consideration of a cost of carbon for DSM cost-effectiveness testing should be within the scope of this proceeding and therefore should be added explicitly to the issues list. This is consistent with the OEB’s direction in its EB-2024-0198 – Enbridge Gas 2026 DSM Plan Decision, issued on November 6, 2025, where it stated:

“The OEB provides the following directions regarding the evidence of Enbridge Gas in support of its 2027+ multi-year DSM plan application:

(1) In its evidence on cost-effectiveness, Enbridge Gas shall address how the economic cost of carbon should be reflected in the TRC-Plus analysis of the programs it will propose in its upcoming updated DSM plan application with full supporting rationale. “

Draft Issues List

BOMA Toronto supports Pollution Probe's recommendation¹ - to modify Issue 16 to:

Issue 16:

- a) Is Enbridge Gas's treatment of input assumptions, cost-effectiveness, avoided costs, economic cost of carbon and non-energy benefits (NEBs) appropriate?*
- b) Have the inputs and assumptions noted above been appropriately applied to the DSM Plan.*

Issues Conference

BOMA Toronto will attend the scheduled Issues Conference on March 12, 2026. We do not plan to make oral submissions but may comment on issues proposed by other parties.

Sincerely,

A handwritten signature in black ink, appearing to read "Clement Li".
