Submitted via email and RESS

Subject: EB-2025-0031 Confirmation of Tariff of Rates and Accuracy

Pursuant to Section 9.2 of the Decision and Rate Order dated March 26, 2026, Hydro Hawkesbury Inc. ("HHI") confirms that it has reviewed the Tariff of Rates and Charges included therein.

HHI confirms that it agrees with the Tariff of Rates and Charges as issued and considers it to accurately reflect the Board's Decision, with one exception. For the Sentinel rate class, the Rate Rider for Disposition of the Global Adjustment Account (2026), applicable only for Non-RPP customers, is currently shown as effective until March 31, 2026, and should instead read March 31, 2027.

HHI further notes that, while efforts are underway to update the IRM model to reflect the Decision and Rate Order, this process remains ongoing. Certain limitations within the IRM model, including restricted access to locked cells and tabs, have created practical constraints in fully implementing the required updates at this time.

HHI will continue working with Board staff to resolve these limitations and complete the IRM model updates as soon as practicable.

Kind regards,
