**LETTER OF COMMENT**

**Comments:**

Hello , The Utility Prices and Property tax rate is increasing every year . My Hydro bill has been doubled in 2026 , I am not sure why ? Because other neighbors in the same area does not have this problem and maybe their bill has increased \$10 this year . I beleive that any increase in the utility bill or property tax or Hydro , should be proper according to the rate of people's income . Our salary does not increase every year and we work with the same salary . Even if they add something to our hourly rate is only 50 cent per hour . This raise can not even cover the inflation rate for grocery . How people can afford increasing rate each year for Hydro bill . Even the business owners now have problem with finding customers , there is no job for them too. So how a low income person like me can afford these bills. I have lost my job recently because of Disability and I can only work limited hours . How can I afford these bills. The government need to give us some subside for Hydro bills . And why in Scarborough people pay less for their bills and here we have to pay more ? Please consider these things I appreciate your time and help . Regards Azam Naseri
