Issues:

Canadian Manufacturers & Exporters ("CME") is Canada's leading business network. Its members represent 75% of manufactured output in the Province of Ontario and 90% of all exports. One of CME's priorities is to improve the business climate for manufacturers. Initiatives pertaining to Energy and the Environment fall within the scope of this objective and include efforts by CME to ensure that its members enjoy continued access to a reliable and cost competitive supply of energy and electricity across Canada. In this context, CME seeks an Ontario electricity system for its members which is reliable, affordable, cost effective and economically sustainable with electricity prices for Ontario manufactures which are competitive with electricity prices available to manufacturers located elsewhere. In light of CME's member base and its objective of maintaining a continued access to a reliable and cost-competitive electricity system in Ontario, CME's members are materially impacted by any proposed rate increases deliberated in this proceeding. CME therefore represents members who have a direct and substantial interest in the outcome of the proceeding. CME intends to participate actively in this proceeding for the purpose of: (a) Assuring that all relevant facts are placed in evidence for the Board's consideration; (b) Making submissions on the issues which the Application raises, including: (i) Whether the IESO's 2026, 2027, and 2028 revenue requirement and proposed usage fees are reasonable and appropriate; and (ii) Whether the IESO's proposal to increase its operating reserve is reasonable and appropriate.

Policy Interests:

N/A

Hearings:

An oral hearing, preceded by a written discovery process and a Settlement Conference, is the most efficient way of determining the issues raised by the Application. An oral hearing should be held to determine any issues which cannot be settled.

Evidence:

At this time, CME does not intend to file evidence in the proceeding.

Coordination with Other Intervenor:

CME is a frequent intervenor, and continually strives to coordinate with like-minded intervenors, including in interrogatories, technical conference questioning, and cross examinations.

Cost Awards:

CME is applying for cost eligibility in this proceeding. CME is eligible for a cost award pursuant to Section 3.03(a) of the OEB's Practice Direction on Cost Awards, as CME "primarily represents the direct interest of consumers (e.g. ratepayers) in relation to services that are regulated but the Board." CME's members are manufacturers that seek reliable, affordable, cost effective and economically sustainable electricity.

Language Preference:

CME intends to participate in English.
