

-- Name --

Sandra Sampogna

-- Do you reside in the impacted service area? -- Yes

-- Comments --

We object to the proposed project as it directly affects are property. First of all, we have a well that is in the field beside our property which shows to be were the construction is proposed. There is a good chance that any digging and construction with machinary can cause damage to our well. Second, we already over paid for our property, and now our property will be brought down by an eye sore. Third, we moved out here to get away from the city and now you want to bring it to us. We moved to the countryside for my health, so I could be closer to nature; to have a backyard view of fields and trees, not big towering hydro poles. The very stress of the thought of this awful view is impacting my health. It is unfair and disgusting to not consider this impact on the property and people in the surrounding area. Fourth, from what I understand we will be on the old infrasture but will be paying the bill with the extra cost that will be billed to us per month. We do not want this hydro monstrosity surrounding us.
