**Re: Ontario Power Generation 2027-2031 Payment Amounts Application
EB-2025-0297**

Dear Mr. Murray:

Attached please find AMPCO's interim cost claim in the above proceeding.

OPG is seeking to recover approximately \$36 billion over the period 2027-2031 making it the largest rate application to date before the OEB. The investments set out in the application amount to over \$30 billion of capital work which includes the Pickering Refurbishment Program (PRP), small modular reactors (SMRs), turbine rotor replacements at Darlington generating station, and many refurbishment projects of hydroelectric assets. The application is extensive, complex, and requests major approvals including a nuclear Custom IR framework, blended nuclear payment amounts, as well as a hydroelectric Custom Price-cap Index to set hydroelectric payment amounts. OPG seeks a change in capital structure, disposition of deferral and variance account balances, and concurrent cost recovery (CCR) of interest amounts for PRP and DNNP SMRs.

AMPCO has worked closely with other intervenors, particularly CCC and SEC, to review and consider the application, prepare interrogatories, and participate in the motions settlement process and the Technical Conference.

AMPCO's participation to date has been focused and comprehensive to be of assistance to the OEB as well as AMPCO members. AMPCO is very interested in many aspects of this application and its membership has requested detailed briefings on the application which AMPCO has included under the Other category in its cost claim. AMPCO respectfully requests reimbursement of its reasonably incurred costs as set out in this cost claim. AMPCO's costs correspond to the size and complexity of the application, AMPCO's interest in the application and the impact on AMPCO members of the requested approvals.
