**EB-2025-0312 Elexicon Energy Inc. (Elexicon Energy) 2027-2031 Custom Rate Application**  
**Pollution Probe Comments on Elexicon Confidentiality Request**

Dear Mr. Murray

On July 10, 2026 Elexicon filed certain undertaking responses and included new evidence related to the AMI 2.0 Business Case which Elexicon assigned as Exhibit 2B, Tab 4, Schedule 3, Appendix D-1. Elexicon requested confidential treatment of the redacted information in Exhibit 2B, Tab 4, Schedule 3, Appendix D-1. Following our request, Pollution Probe was provided access to the unredacted version and provides the following comments.

Overall, it appears that the majority, if not all the redacted areas of Exhibit 2B, Tab 4, Schedule 3, Appendix D-1 do not adequately meet the Considerations in Determining Requests for Confidentiality, per Appendix A to the Practice Direction. The OEB has consistently noted that the OEB's Practice Direction provides that information filed in an OEB proceeding should generally be placed on the public record unless confidential treatment is warranted. Additionally, there are many redactions which could also cause unwarranted procedural challenges during the proceeding should they be approved as confidential and remain redacted. These include the costs range underlying the AMI 2.0 Business Case and all the information/graphs that relate to legacy metering infrastructure compared to AMI.

Pollution Probe recommends that the OEB require Elexicon to file a copy of the unredacted document. Should the OEB determine that any of the elements of the document should be considered confidential, it is recommended that these be minimized for the reasons noted above.

Respectfully submitted on behalf of Pollution Probe.
