Re: Commercial Operations for East Windsor (Expansion) L.P. – OEB License EB-2023-0354

East Windsor (Expansion) L.P.'s filed an application with the Ontario Energy Board (OEB) on December 6, 2023, under section 60 of the Ontario Energy Board Act, 1998 (OEB Act), for an electricity generation license. In OEB's Decision and Order EB-2023-034, the OEB approved the application and stated that it would not take effect until the applicant files written evidence with the OEB confirming completion of construction of the facility and ready to commence commercial operation.

This is written confirmation that East Windsor (Expansion) L.P. is scheduled to have completion of construction of the facility and achieve first sync to the grid between July 22 and July 28, 2026. The asset is then forecasted to being ready to commence commercial operation between September 15 and September 30, 2026. We therefore request an electricity generation license be issued to East Windsor (Expansion) L.P.

I also request to change the primary contact for the licenses to tcoutts@capitalpower.com.

Should you have any further questions, please feel free to reach out to Tracy Coutts at tcoutts@capitalpower.com.

Sincerely,

Tracy Coutts
