Issues:

As described in IGUA's annual intervention form, IGUA represents EGI's largest volume gas customers, and as such has a direct interest in gas rate setting proceedings. IGUA understands that this phase of Enbridge Gas Inc.'s (EGI) 2027 rate case will focus on formulaic adjustment of current rates, with a subsequent phase to be filed to address transition to EGI's recently approved harmonized rates. IGUA expects the first phase of this matter to be relatively mechanical, and expects a greater focus on the second phase of the matter. Nonetheless, IGUA intends to review the application and monitor the record and will determine as the matter proceeds whether it has any particular concerns with proposals advanced by EGI (or any other parties) in respect of the applied for approvals.

Hearings:

We expect, subject to further development of the record herein, that this first, formulaic phase of EGI's 2027 rates application can be disposed through a written process.

Evidence:

IGUA does not anticipate filing evidence in this matter.

Coordination with Other Intervenors:

We regularly work with other intervenors, and in respect of this first phase of setting EGI's 2027 rates we expect to largely defer to other parties, again subject to further development of the record herein, and focus our review on rates for IGUA's members - EGI's largest volume customers.

Cost Awards:

As a party primarily representing the direct interests of gas ratepayers in relation to services regulated by the Board and in respect of which this application to set rates has been brought, IGUA is eligible to apply for a cost award pursuant to section 3.03 of the OEB's Practice Direction on Cost Awards. IGUA requests that it be so determined eligible for an award of its reasonably incurred costs.
