Re: Milton Hydro Distribution Inc. ED-2003-0014
OEB File No. EB-2026-0057
2027 IRM Rate Application

Consistent with Milton Hydro's Cover Letter, dated August 10, 2026, please find attached Milton Hydro Distribution Inc.'s ("Milton Hydro") 2027 Price Cap IR Distribution Rate Application ("Application"). The Application includes an electronic filing through the Board's web portal (Pivotal UX) and is comprised of the:

- Complete copy of the application in PDF form;
- Excel version of the 2027 IRM Rate Generator model;
- Excel version of the 2027 GA Analysis Workform;
- Excel version of the 2027 ICM Model; and
- Excel version of the 2027 IRM Checklist.

By Cover Letter dated August 10, 2026, Milton Hydro notified the OEB that one component of the Application relied on an agreement with a third party that had not yet been executed as of the date of the filing. Milton Hydro confirmed it would notify the OEB promptly upon execution of the agreement. On August 13, 2026, Milton Hydro notified the OEB, confirming the execution of the agreement. Accordingly, Milton Hydro has determined that no revision to the rate application is required with respect to this matter.

Milton Hydro identified an error in Table 15, page 34, wherein two figures for the GS 1,000 - 4,999 kW customer class were erroneously recorded as zero. The correct values are 1,265,000 kWh and 1,800 kW, respectively.

Milton Hydro respectfully submits the revised rate application, wherein Table 15 constitutes the sole revision and the correction thereto does not affect any calculations, bill impacts, or any other schedules contained in the Application.

Sincerely,

Daniel Smith, CPA
Director, Regulatory Affairs
