File no. G10118758

Dear Sir/Madame:

Re: Ontario Energy Board Hearing EB-2026-0155

Our Client: Brian Jensen — 1941 Concession Road 10, Blackstock, Ontario

Our Client: Mandy Jensen — 262 Ballyduff Road, Pontypool, Ontario

Hydro One Networks Inc. - Durham Kawartha Transmission Line

We are counsel for the intervenors, Brian Jensen ("**Mr. Jensen**") and Mandy Jensen ("**Ms. Jensen**") and collectively the "**Intervenors**", with respect to the Ontario Energy Board ("**OEB**") hearing filed as EB-2026-0155.

In accordance with Procedural Order No. 1 issued on August 12, 2026, we are requesting leave to file the following evidence with the OEB:

- Aerial Photos of the Intervenors' properties, municipally known as 1941 Concession Road 10, Blackstock, Ontario and 262 Ballyduff Road, Pontypool, Ontario (the "**Intervenors Properties**");
- Photos of the Intervenors Properties;
- Affidavit(s) from the Intervenor(s);
- Relevant expert report(s) regarding site remediation for damages caused by Hydro One Inc. ("HONI") to 1941 Concession Road 10, Blackstock, Ontario; and
- Cost estimate from a contractor regarding site remediation of 1941 Concession Road 10, Blackstock, Ontario.

We anticipate that the cost for the relevant expert report(s) will be in the amount of approximately \$40,000.00, and that the cost estimate from a contractor will be a nominal amount, if any. With respect to legal costs to prepare written interrogatories, submissions and attendance at hearing, we anticipate this to be in the range of \$60,000.00.

Any affidavit(s) filed by the Intervenors will outline the impact and damage caused by HONI to 1941 Concession Road 10, Blackstock, Ontario, as a result of HONI's preliminary efforts to construct the 230kv double circuit transmission line between the Dobbin Transformer Station and the Clarington Transformer Station, which was performed by HONI in 2025 pursuant to a permission to enter granted

by Mr. Jensen. The damage to Mr. Jensen's property was the result of HONI's failure to employ reasonable measures to prevent the movement of disturbed topsoil downhill and into a watercourse. Such reasonable measures include the employment of best practices, including and not limited to the erection of a silt fence enclosing the area of work. The Intervenor wish to ensure that the erection of silt fencing and the taking of any other protective measures as recommended by the Intervenor's experts are implemented by HONI prior to the commencement of any work. Affidavit(s) filed by the Intervenor will go into further detail of the damage caused by HONI. Expert report(s) to be filed by the Intervenor will detail the best practises which should be employed by HONI and will support the remediation efforts required in order to repair the damage caused by HONI, as well as the cost to do so.

We look forward to hearing from the OEB with respect to our request for leave to submit evidence.

Sincerely,

Gowling WLG (Canada) LLP
