Re: InnPower Corporation 2027 Electricity Distribution Rate Application OEB File No. EB-2026-0052
Dear Ontario Energy Board Commissioners, I am an InnPower residential customer, and I am writing to express my opposition to the proposed increase in electricity distribution rates and InnPower's request to rebase its rates in 2027 rather than in 2029 as previously planned.

Households in our community are already facing significant and continuing increases in the cost of living. As a homeowner, I have experienced increasing property taxes and other household expenses, including utilities, insurance, groceries, and financing costs. Even relatively small additional increases, when added together, create an increasing financial burden on residents.

I understand that maintaining a safe and reliable electricity distribution system requires investment. However, before approving any additional costs to be passed on to customers, I respectfully ask the OEB to closely examine whether all of InnPower's proposed expenditures are necessary, reasonable, and appropriately timed.

In particular, I ask the OEB to carefully consider why InnPower needs to rebase its rates in 2027, two years earlier than previously planned, and whether some expenditures can be reduced, deferred, or funded through greater operational efficiencies rather than through higher customer rates.

I respectfully request that the OEB protect residential customers from unnecessary or premature rate increases and approve only those costs that InnPower can clearly demonstrate are essential, prudent, and in the best interests of its customers.

Thank you for considering my comments as part of proceeding EB-2026-0052.

Sincerely,
Ehya
