Re: EB-2026-0056 – London Hydro 2027 Rate Application I am a residential customer of London Hydro in London, Ontario near Clarke / Trafalgar. We are a family of 4. I am writing about the proposed \$6.01 per month increase for a typical residential customer. I understand costs for materials and growth have risen, but hydro is an essential service, and many families are already under pressure. I ask the OEB to ensure: The increase is justified as reasonable and in the public interest, with investments prioritized and timed carefully. Large new loads, such as data centers, are not subsidized by residential customers. They should pay full costs for their connection and any system upgrades and be in a separate rate class. Low-income supports like OESP and LEAP continue and are easy to access. Please keep affordability front and center while reviewing this application. Thank you,

Jason Kemp
