EB-2025-0295	Natural Gas – Rates	Granted
EB-2025-0252	Electricity – Rates	Granted
EB-2024-0004	Electricity – Rates	Granted

Issues:

Environmental Defence intends to explore the following issues: - Whether the costs and benefits of the proposed non-wires solution have been calculated appropriately; - Whether the NWS design is appropriate; - Conditions of approval; and - Other topics relating to the interests of customers seeking clean and affordable power.

Policy Interests:

Environmental Defence's interest in this proceeding is in promoting both the public interest in environmental protection and the interests of consumers who desire clean and affordable energy. This interest is relevant in that non-wires solutions can both lower energy bills and GHG emissions.

Hearings:

Environmental Defence takes no position on the type of hearing in this proceeding.

Evidence:

Environmental Defence does not intend to file evidence.

Coordination with Other Intervenors:

Environmental Defence intends to coordinate with other intervenors, as it has on other OEB proceedings.

Cost Awards:

Environmental Defence is eligible for a cost award primarily under s. 3.03(b) of the Practice Direction as it primarily represents an interest or policy perspective relevant to the Board's mandate and to the proceeding for which cost award eligibility is sought, namely environmental and climate protection. In addition, with respect to s. 3.03(a) of the practice direction, Environmental Defence also represents the interests of consumers whose energy bills can be reduced through measures that lower both costs and environmental impacts.

Language Preference:

We will participate in English.
