Ontario Energy Board | Commission de l'énergie de l'Ontario

EB-2025-0312

Elexicon Energy Inc.

Application for Electricity Distribution Rates and Other Charges Beginning January 1, 2027

Decision on Request for Confidential Treatment of Interrogatory and Undertaking Responses
November 5, 2026

Elexicon Energy Inc. (Elexicon Energy) filed a cost of service application with the Ontario Energy Board (OEB) on December 19, 2025 under section 78 of the *Ontario Energy Board Act*, *1998*, seeking approval for changes to the rates that Elexicon Energy charges for electricity distribution, beginning January 1, 2027, and for each following year through to December 31, 2031.

On May 8, 2026, Elexicon Energy filed a letter requesting permanent redaction and/or confidential treatment of certain portions of its responses to interrogatories pursuant to the OEB's *Practice Direction on Confidential Filings* (Practice Direction).[1] Redacted versions of the interrogatory responses were filed on the public record, and unredacted versions were filed with the OEB in confidence.

On May 22, 2026, OEB staff filed a submission on Elexicon Energy's confidentiality request. OEB staff agreed with most of the proposed redactions but opposed or sought clarification on certain items.

On May 29, 2026, Elexicon Energy filed a reply submission which provided additional explanation for certain redactions, clarified the basis for some confidentiality claims, and identified a limited number of redactions that Elexicon Energy agreed to withdraw, in response to OEB staff's submissions.

A Technical Conference was held from June 22-25, 2026. Elexicon Energy subsequently filed undertaking responses and an AMI 2.0 Business Case. On July 10, 2026, Elexicon Energy requested confidential treatment or permanent redaction of

[1] EB-2025-0312, Letter Request for Confidential Treatment of Information in Interrogatory Responses, May 8, 2026.

certain information contained in its undertaking responses and AMI 2.0 Business Case pursuant to the Practice Direction.[2]

The OEB has considered Elexicon Energy's May 8, 2026 and July 10, 2026 confidentiality requests, OEB staff's May 22, 2026 submission, and Elexicon Energy's May 29, 2026 reply submission in making this Decision.

Confidentiality Requests

Elexicon Energy requested confidential treatment and/or permanent redaction for portions of its interrogatory responses across several categories, as set out in its May 8, 2026 letter, updated in its May 29, 2026 reply submission. On July 10, 2026, Elexicon Energy further updated its request for confidential treatment or permanent redaction of certain information contained in its undertaking responses and AMI 2.0 Business Case. The categories of information for which Elexicon Energy is seeking confidential treatment include the following:

- Information that poses a cybersecurity risk
- Third-party consultant and vendor pricing and unit pricing information
- Commercially Sensitive and Proprietary Consultant Methodology
- Competitive third-party pricing and bid-related information
- Information that could interfere with a future competitive procurement
- Information about the physical security of Elexicon Energy's sites
- Labour-sensitive forecast information
- Commercially sensitive information that can prejudice Elexicon Energy's competitive position in the labour market
- Compensation information that is personal information
- Solicitor-client privileged information
- Non-Relevant HST Numbers
- Non-Relevant Tax Information
- Personal customer information
- Business numbers and employee-specific information that Elexicon Energy submits are not relevant to the proceeding

In its July 10, 2026 letter, Elexicon Energy also requested additional restrictions on access to the labour-sensitive information contained in its response to undertaking JT3.17.

[2] EB-2026-0312, Confidentiality Request of Elexicon Energy Inc., July 10, 2026.

In a schedule attached to its May 8, 2026, request letter, Elexicon Energy included a table which details its requests for confidentiality, including the applicable evidence references, explanations and rationales, and an indication about the types of redactions and whether presumptive confidential treatment is applicable. Elexicon Energy's May 29, 2026, letter included the same table of requested redactions with updated references. Elexicon Energy's July 10, 2026 letter also included its list of confidentiality requests in a similar table format.

After obtaining access to the unredacted document, Pollution Probe filed a letter dated July 15, 2026 submitting that most, if not all, of the redacted information in the AMI 2.0 Business Case did not satisfy the OEB's confidentiality criteria and recommending that the document be placed on the public record, with any confidential treatment limited to only those portions the OEB determined warranted protection.[3] In its July 24, 2026 reply submission,[4] Elexicon Energy disagreed with Pollution Probe's position and submitted that its redactions were limited and appropriately targeted to commercially sensitive information. Elexicon Energy argued that the redacted information relates primarily to cybersecurity risks, future competitive procurement processes, and third-party pricing information, and that disclosure could harm Elexicon Energy's interests and those of its customers and ratepayers. Elexicon Energy reiterated its request that the OEB grant confidential treatment for the disputed portions of the AMI 2.0 Business Case.

In Appendix A to this Decision, the OEB has summarized the confidentiality requests made by Elexicon Energy. For the purposes of this Decision, the OEB has numbered the requests in the 'Reference' column. References 1-51 correspond to the combined confidentiality requests in Elexicon Energy's May 8, 2026 and May 26, 2026 letters, and references 52-65 correspond to the July 10, 2026 requests.

OEB Staff Submission

On May 22, 2026, OEB staff filed a submission on Elexicon Energy's proposed redactions in its May 8, 2026 request for confidentiality.

OEB staff submitted that many of Elexicon Energy's requests fall within presumptively confidential categories under Appendix B of the Practice Direction or otherwise meet the criteria set out in Appendix A. However, OEB staff did not agree with certain specific redactions, particularly within the category of cybersecurity-related and third-party

[3] EB-2025-0312, Pollution Probe Comments on Elexicon Confidentiality Request, July 15, 2026.
[4] EB-2025-0312, Elexicon Energy Inc. Undertaking Responses and AMI 2.0 Business Case Confidentiality Request Reply Submission, July 24, 2026.

commercially sensitive information. OEB staff submitted that some redacted material appeared to be high-level, generic, or not expected to give rise to harm if disclosed.

In its submission, OEB staff stated that it agreed with at least one of the reasons listed in Elexicon Energy's cover letter for the proposed redactions for references 1-2, 4-7, and 9-51 of Appendix A. OEB staff either partially agreed, opposed or sought clarification on references 3[5] and 8[6] in Appendix A.

In its May 29, 2026 reply, Elexicon Energy addressed the redactions challenged by OEB staff and provided additional clarification as requested.

Decision on Redactions

The findings in this Decision are divided into two categories: findings on uncontested redactions (i.e. requested redactions to which no party nor OEB staff objected), and contested redactions, which include redaction requests to which OEB staff raised an objection.

Findings on Uncontested Redactions

The OEB grants confidential treatment of the redactions in the undertaking responses, which were not challenged by any party or OEB staff and which are identified in Appendix A of this Decision. The OEB finds that the requests fall within presumptively confidential categories under Appendix B of the Practice Direction or otherwise meet the criteria set out in Appendix A of the Practice Direction.

The OEB notes that the attachment for the response to 1-SEC-1 has not been filed in an unredacted format by Elexicon Energy as required by the OEB's *Practice Direction on Confidential Filings*. In taking this approach, Elexicon Energy has invoked its right to not file the material based on solicitor-client privilege. Appendix B to the Practice Direction includes information covered by solicitor-client privilege among categories of information that will presumptively be considered confidential, subject to any objections from parties as to why confidential treatment should not be accorded to such information in a particular proceeding. Beyond that, however, section 15(2)(a) of the *Statutory Powers Procedure Act* provides that "[n]othing is admissible in evidence at a hearing, (a) that would be inadmissible in a court by reason of any privilege under the

[5] 6-Staff-148, Attach.6_Tax Return 2019 Elexicon Energy Inc.
[6] 4-CCC-51, Appendix A – Dx NEXT RFP Final – Page 13 (Appendix A, Part 3, PDF Page 22).

law of evidence". The OEB will therefore not require Elexicon Energy to file the attachment as requested by 1-SEC-1.

Findings on Contested Redactions

The OEB acknowledges the submission from Pollution Probe that most, if not all, of the redacted information in the AMI 2.0 Business Case did not satisfy the OEB's confidentiality criteria and that the document be placed on the public record, with any confidential treatment limited to only those portions the OEB determined warranted protection.[7] However, the OEB is satisfied that the redacted information relates primarily to cybersecurity risks, future competitive procurement processes, and third-party pricing information. Accordingly, the OEB grants confidential treatment for the disputed portions of the AMI 2.0 Business Case.

- **Third-Party Commercially Sensitive Information**

Reference 8: 4-CCC-51, Appendix A – Dx NEXT RFP Final – Page 13 (Appendix A, Part 3, PDF Page 22)

OEB staff did not agree that the description of the length of the software licenses represents a cybersecurity risk to Elexicon Energy.[8]

In its reply submission, Elexicon Energy clarified that these redactions fall under the category of third-party commercially sensitive information, rather than for reasons relating to cybersecurity.[9] The length and form of the software licensing arrangements were specifically negotiated items during the Dx NEXT procurement. Further, Elexicon Energy argued that earlier in this proceeding, the OEB accepted its request to redact similar information.

Findings

The OEB agrees with OEB staff that these redactions do not qualify for confidential treatment based on cybersecurity risk. However, the OEB accepts Elexicon Energy's revised submission that they qualify for confidential treatment under the category of third-party commercially sensitive information in accordance with Appendix A, paragraph (a)(i) of the Practice Direction.

Cyber Security Risk

Reference 8: 4-CCC-51, Appendix A – Dx NEXT RFP Final – Page 61 (Appendix A, Part 3, PDF Page 70)

OEB staff submitted that the description of the redacted software (in the column 'Description') does not appear to represent a cybersecurity risk to Elexicon Energy.[10]

Following review, Elexicon Energy agreed to remove this redaction.

The OEB notes that in its objection[11] Pollution Probe did not identify any specific reason why this information does not pose a cybersecurity risk, nor does Pollution Probe explicitly state that the redactions pertaining to cybersecurity specifically are problematic.

Findings

The OEB acknowledges that Elexicon Energy has agreed to remove this redaction of the software (in the column 'Description') since it does not appear to represent a cybersecurity risk to Elexicon Energy.[12] Accordingly, no finding is necessary.

Reference 8: 4-CCC-51, Appendix A – Dx NEXT RFP Final – Pages 65, 74, 139, 142, 174, and 198 (Appendix A, Part 3, PDF Pages 74, 81, 148, 151, 183, and 207)

OEB staff submitted that the software requested for redaction does not represent a cybersecurity threat, particularly because the software is commonly used in the industry.[13]

Elexicon Energy submitted that it is appropriate for the OEB to allow the redaction of this information, as the application contains large amounts of sensitive financial and personal information of Elexicon Energy's employees. Elexicon Energy submitted that since it is responsible for the stewardship of this sensitive information, it is appropriate to redact the name of this software and, consequently, the location of this data. Disclosing the name of the software could also facilitate unauthorized access to the system by a malicious actor. Elexicon Energy further submitted that while this is commonly used industry software, harms could materialize if this information were to be publicly disclosed. Elexicon Energy has deemed this one of its high-risk applications

[10] OEB Staff Submission Confidentiality, May 8, 2026, p. 5
[11] Pollution Probe Submission on Confidentiality Request, July 15, 2026.
[12] OEB Staff Submission Confidentiality, May 8, 2026, p. 5
[13] *Ibid*, p. 6

requested for redaction. Additionally, Elexicon Energy submitted that the OEB had allowed redaction of similar information earlier in this application.

Findings

The OEB grants confidential treatment of these requested redactions based on cybersecurity.

The OEB agrees with Elexicon Energy that while the requested redactions refer to commonly used industry software, harms could materialize if this information were to be publicly disclosed, which could facilitate unauthorized access to the system. Additionally, the OEB allowed redaction of similar information earlier in this application.

Third-Party Commercially Sensitive Information

Reference 3: 6-Staff-148, Attach.6_Tax Return 2019 Elexicon Energy Inc.

OEB staff submitted that the information that Elexicon Energy seeks to redact is generic information containing commonly used software names and unspecific financial, inventory, and work systems.[14] OEB staff did not agree with Elexicon Energy that this information represents a cybersecurity risk.

Elexicon Energy has agreed to remove these redactions. In addition, Elexicon Energy noted it will remove proposed redactions for similar information included in Veridian's 2018 and Elexicon Energy's 2020-2023 tax returns (Reference 1 in Table 1 above).[15]

Findings

Elexicon Energy has agreed to remove these redactions and to remove proposed redactions for similar information included in Veridian's 2018 and Elexicon Energy's 2020-2023 tax returns (Reference 1 in Table 1 above).[16]. Accordingly, no finding is necessary.

Pacific Economics Group Report

On April 10, 2026, OEB staff advised the OEB of its intention to file third-party expert evidence in this proceeding. OEB staff retained Pacific Economics Group Research LLC (PEG) to prepare an expert report regarding Elexicon Energy's proposed Custom

[14] OEB Staff Submission Confidentiality, May 8, 2026, p. 6

[16] 6-Staff-148, Attach.2_Tax Return 2018 Veridian Connections Inc.

Incentive Rate-setting (Custom IR) framework and the evidence filed by Elexicon Energy's consultant, Clearspring Energy Advisors (Clearspring).

On May 22, 2026, OEB staff filed a letter with attached copies of PEG's working papers and datasets related to the expert report. Pursuant to Rule 10.01 of the OEB's *Rules of Practice and Procedure* and the Practice Direction, and on behalf of PEG, OEB staff requested confidential treatment for the PEG working papers. Since the working papers include data owned by both Clearspring and PEG, the request is intended to maintain confidentiality of commercially sensitive information owned by both consultants.

The OEB received no objections to OEB staff's request for confidentiality.

Findings

The OEB approves confidential treatment for the PEG working papers, pursuant to Rule 10.01 of the OEB's *Rules of Practice and Procedure* and the Practice Direction. More particularly, this approval includes data owned by both Clearspring and PEG and will maintain the confidentiality of commercially sensitive information owned by both consultants.
