Smart Meter Adder

Ref.: 2009 IRM Model, Sheet J1.1

The request for a continuation of the \$0.25 smart meter funding adder on sheet J1.1 of the 2009 IRM model indicates that Clinton Power does not plan to implement a smart meter program in 2009. Please confirm that this is the case and indicate the proposed year of smart meter implementation.

This was an error in filing. Clinton is officially requesting (via this interrogatory) for the generic \$1.00 smart meter adder allowed for implementing LDC.

Clinton is part of the London Hydro RFP, approving them for 2009 implementation. The Smart Meter filing requirements are provided below.

- Meters installed for 2009 – 500
- Average cost per end point - \$135 installed
- Total 2009 Installed Capital - \$67,500
- Annual Operating costs - \$30,000
- Clinton will not be installing functionality above the minimum standard
